# THE PROBLEM?

## UTILITY

Companies are hard-pressed to find a bag that can do it all. Most bags can do some things but few bags can do everything. Customers are looking for a durable, reusable, customizable, and high-quality bag that can represent their brand year-round.

## CORPORATE SOCIAL RESPONSIBILITY

In this economic climate, hampers are becoming more popular and clients are asking for bags that can accommodate a higher weight threshold for grocery distribution. Companies are also searching for the best product to achieve their CSR goals.

## QUALITY

Many bags fail the quality test and either burst at the seams or handles when subject to high-weight loads. Many bags carry heat transfer or screen prints which can fade or peel after washing. There is an inherent print limitation when printing bags locally.

## COST

Local bag costs are high which means that a limited budget can only yield a small quantity of bags.

## REDUCE/ RECYCLE INITIATIVE

Companies need to invest in promotional bags that can be reused over and over and that do not have a negative impact on the earth.
