

MS EUROPEAN DOBERMANS, LLC
Stud Service Agreement (4 Pages)

This agreement is made this _____ day of _____, _____ between
MS European Dobermans, LLC located in Hernando, MS and the Dam Owner listed below:

Dam Owner's Name: _____

Address: _____

Phone : _____ Email : _____

The contract terms set forth are for the benefit of each individual dog and owners. Our commitment is to practice integrity in our business practices, and we require the same from breeders for the long-term welfare of pups & integrity of the breed.

All Agreements in Writing:

It is understood that there are no other agreements between the parties to this agreement or warranties or guarantees of any kind, made verbally, posted on the Stud Owner's website or communications other than in writing herein and that any new agreements or other agreements made or accepted by either party must be acknowledged and accepted in writing by both parties delivered by post or email.

USE OF AI STUD SERVICES

1. Fresh Chilled Semen for Artificial Insemination

\$850 Stud Fee payable to MS European Dobermans on or before day of collection

(As industry standard, Dam Owner pays Veterinarian directly for the collection/analysis/preparation for shipping and shipping costs)

We require a \$400 refundable deposit to reserve a collection day (part of total amount). This is not refundable once collection has occurred unless analysis is considered unsatisfactory by our vet. Remaining balances to MS European Dobermans and Veterinarian clinic are due immediately before shipment will be released.

Overnight shipping cost will vary depending upon day of the week, shipping location, etc.

(Note: Stud collection must be done before 2 p.m. the day of shipment. Collection/Shipment on Saturday is typically available but veterinarian requires at least a 24-hour notice and the shipment should arrive on Monday.)

We will need to coordinate plans to ensure proper arrival time/availability.

Tip: We have found TCI to be the most reliable method of reproduction and worth the expense and peace of mind to help ensure a litter. Some females have unknown physiological issues that can inhibit the quality of a standard AI procedure or natural breeding.

USE OF AI STUD SERVICES

2. Fresh Collected Semen for AI Breeding

\$850 Stud Fee payable to MS European Dobermans on or before day of collection

(As industry standard, Dam Owner will pay Veterinarian directly for collection/analysis costs, progesterone tests, and TCI procedure fees. Stud fee payment is due in full before collection occurs. In the very unlikely event of unsatisfactory analysis by vet, a full refund will be given.)

Tip: We have found TCI to be the most reliable method of reproduction and worth the expense and peace of mind to help ensure a litter. Some females have unknown physiological issues that can inhibit the quality of a standard AI procedure or natural breeding. With that being said, we recommend using our preferred Veterinarian for TCI if within driving distance.

Animal Clinic of Oxford, MS is regionally known for the quality of their reproduction program and has been a great choice for us in the past. If you desire to bring your female to them for Trans-Cervical Insemination (TCI), they have been one of the best clinics we have worked with in the past. They use quality progesterone testing to help know exactly when your female's fertile window occurs and If you are out of town and is difficult to bring your female in for progesterone testing, you can board your female with them for no charge until TCI breeding is completed.

The clinic recommends getting the first progesterone test done 5 to 7 days after the first sign of blood. However, please keep us updated on the planned breeding date given to you so that we can prepare.

(If you choose to use a different veterinarian than Animal Clinic of Oxford for AI, we charge \$1 mile for travel over 30 miles from Hernando, MS.)
