

## NATIONAL ETHIC'S OF MARTIAL ARTS COUNCIL

To school owners,

NEMAC Is an organization that helps martial arts school owners and their students stay safe by making sure the staff/employees of the studio do not have violent or sexual assaults in their back grounds. We perform back ground checks for these reasons. **\*\*the term “staff” will refer to employees and volunteers.** Members of NEMAC will be given free training on how to approach situations, protocol rules to keep staff and school safe from allegations and law suits. NEMAC will not provide legal counsel if there is a law suit however having the NEMAC accreditation does show a level of professionalism and studios attempts at keeping students and staff safe. It shows your facility has undergone safety trainings. It also shows that you care for your students by taking these responsible steps for safety. No back ground check can guarantee 100% safety but it lets your students know you have taken the steps and training to keep them safe. AS a NEMAC member you will be able to go to the NEMAC regional seminars with your entire staff up to 4 people for FREE. If there is no NEMAC training facility in your region, your school can host the training seminar. Ask for details.

This will be a safety and protocol training and testing. The events will also have optional trainings for moral building, team building, and leadership

skills. We are not an organization that tries to infiltrate your system with a different martial arts style. We are martial artists, however, we **do not** try to teach your staff a different system.

Your school will be seen as an elite school that cares enough to keep your students safe from unknowingly having a predator working for you. It sets you above your competition in your community by having a Nation backing of your ethics. Your name will be listed on the national data base and it will show who is in your organization that has had a background check.

Make your studio stand out in a good way with the NEMAC accreditation!

After the test and accreditation you will receive your schools NEMAC window decal, your protocol poster (which is summarized in this work book) and your schools name, location and names of checked and certified staff on our website directory.

Please use the next section for yourself and your staff to study and take the test. This is an “open book” test. It’s about learning and knowing the correct answers. Please print/copy the next section for study and testing of staff.
