

Through years of public exhibitions and the circulation of thousands of brochures far and wide the Intricarved claim has stood completely unchallenged. Not one critic, curator or institution has offered a valid contradiction to its absolute uniqueness. If any can honestly claim they have never heard of ‘Intricarved’, The Andamooka Tiger or ‘Cal the Stoner’, that admission only highlights the reality that their chain of intelligence is seriously flawed and out of touch.

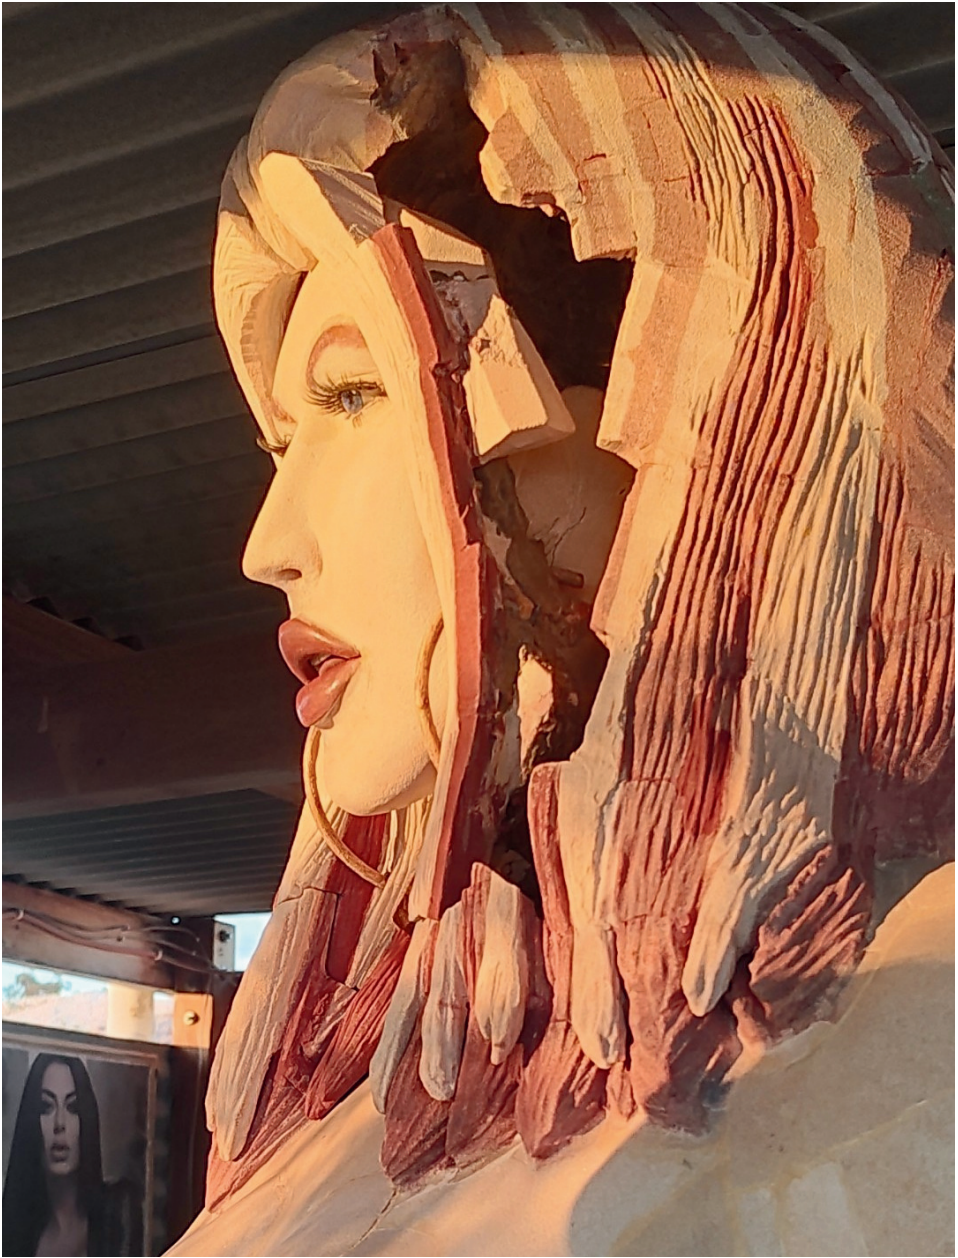

The “buck” stops squarely at the top.

An absolute original art style is an entirely independent visual creation that shares no derivation, hybridization, or structural geometry with any know historical or contemporary art form.

No person connected in the making of these brochures is accountable for them. Cal the Stoner stands alone on taking all criticism or fallout.

INTRICARVED

Australia has operated within established global frameworks - until Cal the Stoner, Australia’s first authentic art style creator since ancient indigenous art. Intricarved is not a continuation or variation of any traditional sculpture method; rare in global art, it is a world first technique and aesthetic. There are no conceptual tricks, no shortcuts and no reliance on manufactured “deep meaning” to bait the pretentious sentimental cliques of the establishment. Each work is painstakingly detailed, capturing the eye- and holding it. The work stands alone and speaks for itself.

- “ This has blown our minds away. Thank you Cal for allowing us to view your work” - 5522 S.A.
