

The Cali window, also known as REHAU System 190, combines the simplicity of a side-load design with high performance. New construction and replacement designs use common sash components, resulting in easier fabrication, reduction in inventory and lower production costs. The system offers different frame options for accessory grooves, integral nailing and/or stucco fin. With the System 190 design, single hung, single slider and fixed configurations are possible. Available in white, beige, and clay.

Up to 3/4 in (19 mm) glazing capability provides excellent acoustical and energy performance properties to meet current standards

Interlocking sashes with weather seals guard against air and water infiltration

Pocket sill with frame accessory grooves provides structural integrity

Frame accessory grooves accept a variety of accessories such as brickmolds, extension jambs and mulling components

Main profiles engineered with multiple chambers increase strength, energy performance and allow efficient water drainage

Integral nailfin provides option for use in new-construction and replacement applications

Frame design accepts a variety of screen styles including FlexScreen

Performance Summary

Structural: up to LC-PG40

Acoustical: up to STC 32; OITC 27

Thermal: down to 0.24*

* based on simulation
