

The Pacific, also known as REHAU System 2150, high-performance sliding door is customizable and versatile, with configurations for new construction and replacement in residential and light commercial applications. The system is available in white, beige and clay.

Welded frame and sash corners provides structural durability and reduced air and water infiltration

4 9/16 in (116 mm) frame depth provides flexibility for new construction and hassle-free replacement installation

Internal sill drainage system achieves superior resistance to water leakage

Engineered aluminum reinforcements provide excellent structural ratings

Up to 1 1/4 in (32 mm) glazing channel accommodates triple glazing, increasing both energy efficiency and acoustical properties

Multiple configurations allow flexibility for X-O, O-X, O-X-O, O-XX-O operation

Frame accessory grooves offer flexibility for installation of jamb extensions, drywall returns and other accessories

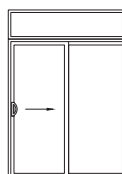

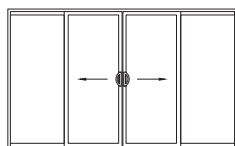

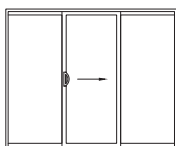

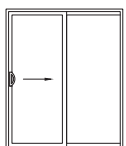

Performance Summary

Structural: up to LC-PG45

Impact: designed for impact DP50

Thermal: down to 0.20*

* based on simulation
