

Would you like hygienically cleaned carpets and upholstery for your home or workplace?

RubixClean offer specialised cleaning of carpets and upholstery using the industry's leading anti-microbial biocide treatment. This high quality product has been developed by the UK's leading manufacture of cleaning chemicals and treatments, It meets the European Test Standard EN1276 and is a safe and effective treatment against a wide range of bacteria and viruses including MRSA, Listeria, Salmonella, Legionella, Influenza, Rubella, Hepatitis B and HIV.

Our technicians are able to treat a wide range of carpet and upholstery fibres using this product and combined with our professional steam extraction equipment we can safely clean areas of your home or office to remove the dangers of bacteria and viruses that can cause sickness to spread.

This product is also suitable for use on hard surfaces.

Our treatment is the number one choice for people who would like to reduce the risk of the lead of the flu virus in your home or workplace.

Once the treatment process has been completed will use

steam powered extraction equipment to remove any residue chemical and also rinse the carpet or upholstery to leave your home or workplace hygienically clean.

This treatment is very popular with our customers who have young children or are expecting a new born, We also have a very wide range of commercial customers who want to reduce the number of sick days taken in the workplace by reducing the risk of spreading viruses like influenza or salmonella among staff and colleges.

Rubix Clean

Your local carpet and
upholstery cleaning experts
