The staff at Speedway Autobody realizes it is very inconvenient to be without your vehicle.

We promise to return your vehicle to you as quickly as possible without compromising the quality of repairs just to meet a target date.

Factors to Consider That May Occur During the Repair of Your Vehicle

Re-inspections: Hidden damage requires us to stop work, notify your insurance company, and wait for re-inspection and approval before continuing. Their supplemental paperwork confirms the updated repair process.

Parts: Delays may occur if parts are not available or require ordering. I authorize Speedway Autobody to order parts on my behalf for the repair of my vehicle.

Color Match: Every color is unique. Even new vehicles require precise color tinting which may take over two hours.

Reassembly: To prevent overspray or peeling, we remove and later reattach painted parts with care, which takes time.

Weather: Cold weather slows drying. Hot weather may cause unwanted chemical reactions.

Previous Repairs: Repairs overlapping previously repaired areas may require additional work to ensure quality.

If we cannot repair your vehicle, a charge will apply for labor done during disassembly and damage estimation.
