

# AN OPEN LETTER TO HIS EXCELLENCY PRESIDENT FERDINAND R. MARCOS, JR.

We are humble, God-fearing citizens of the Philippines who believe in the Constitution that rules our beloved country, and pray for God's abundant blessings to pour upon our land and our people. We write to you now, recognizing the importance of the position you now hold, in the hope that you will protect and lead our people responsibly during these uncertain and treacherous times, armed with Wisdom, Truth, and Righteousness.

Mr. President, you have stated your intention to extend the COVID-19 State of Emergency until the end of the year. Under Republic Act No. 11332, a public health emergency exists when an infectious agent or biological toxin poses a high probability of death, serious injuries, or a significant risk of substantial harm to a large percentage of the population. While there are ongoing COVID-19 infections, the deaths resulting from these infections are **extremely low**. Out of the 3.89 million COVID-19 cases officially reported in the DOH COVID-19 tracking system between March 2020 and September 8, 2022, 62,167 people have died. **This is an infection fatality rate of just 1.5%**. In other words, **98.5% of people who tested positive for COVID have survived, many without vaccination**. This is thanks to good supportive home care, time-tested natural remedies and repurposed drugs that are readily available, effective, and inexpensive. For those who needed help, our resourceful doctors have taken seriously their role as healers and have saved hundreds of thousands of lives.

Governments all over the world are recognizing that COVID-19 is now endemic, are lifting pandemic measures, and are returning to normalcy. Countries such as the U.K., Australia, Canada, Brazil, Spain, Italy, and Singapore have already ended their states of public health emergency and have lifted mandates on vaccination, mask-wearing, and testing. More than 70 countries – including the U.K., Australia, Italy, South Africa, New Zealand, Germany, Israel, Saudi Arabia, and Malaysia – no longer require proof of vaccination and RT-PCR testing for the entry of international travelers.

So COVID-19 is not as deadly as feared, and we know how to treat it safely and effectively. Please consider that in fact and in law, **THERE IS NO COVID-19 PUBLIC HEALTH EMERGENCY**. Just as we live with the common flu, it is in our nation's interest to simply live with COVID-19. There is no need for continual alarm systems and extreme public health measures. There is no need to require vaccine passports, vaccine mandates, expensive painful RT-PCR testing, and masks which make us inhale our own waste and micro-fibers that damage our lungs.

There is a far greater threat to the security and very existence of our nation!

Since the administration of the COVID-19 vaccines starting in March 2021, thousands of Filipinos from all over the country have suffered adverse reactions and injuries. According to the latest Philippine FDA **Reports of Suspected Adverse Reaction to COVID-19 Vaccines as of 6 August 2022**, it has received 105,897 case reports of adverse events following immunization. Out of these, there were **225,902 suspected adverse reactions, 9,426 of which were serious and 2,620 people died**.

(Extracted from the FDA Report issued covering 01 Mar '21 – 06 Aug '22, P.5)

Vaccine	Date Started	Total Vaccine Doses Administered	Total number of Reports	Reports of non-serious events	Reports of serious events
CoronaVac	01 Mar 2021	45,962,793	36,042	32,713	3,329
AstraZeneca	07 Mar 2021	22,040,965	37,151	35,306	1,845
SputnikV/ Sputnik Light	04 May 2021	1,108,400	881	831	50
Cominaty	13 May 2021	62,463,179	19,811	17,527	2,284
Moderna	30 June 2021	19,566,586	6,286	5,538	748
Janssen	20 July 2021	7,195,289	5,314	4,226	1,088
Sinopharm	25 Aug 2021	1,039,740	412	330	82
<b>TOTAL</b>		<b>159,376,952</b>	<b>105,897</b>	<b>96,471</b>	<b>9,426</b>

## Reports involving death

As of 06 August 2022, 2,620 fatal events were received.

Under the precautionary principle, when an activity could possibly cause harm to human health, governments must err on the side of caution even if causality has not yet been fully established scientifically. It is also a fundamental principle of law that persons must exercise, at the very least, the diligence of a good father of a family. Under its Charter, the FDA has the mandate and duty to implement a risk management plan that includes ordering the ban, recall, or withdrawal of any health product found to be imminently injurious, unsafe, or dangerous. However, the FDA has stated that the reported deaths are "coincidental" on preexisting comorbidities or due to natural COVID-19 infection (after the vaccination that was supposed to have prevented serious illness and death). Other serious reactions have been dismissed as "inconclusive due to insufficient information" or "still under evaluation".

To make matters worse, not only has the vaccination program not been stopped in response to reported deaths and injuries: **it has even been ramped up!**

Just a few days ago, the Population Commission announced that 2021 was the "deadliest" in Philippine history, with 879,429 recorded deaths. This is an increase of 43.2%, 265,493 excess deaths, in a single year, in still incompletely compiled data!

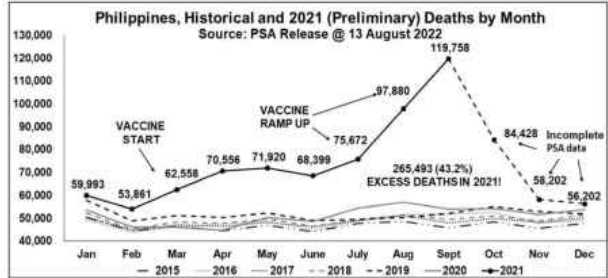

Can these excess deaths be explained by COVID-19? Based on DOH statistics, there were 43,782 recorded COVID-19 deaths in 2021 which was just 5.0% of the total deaths from all causes. What accounts for the remaining 95% (835,706) deaths? We are seeing a sharp increase in the incidence of heart attacks, strokes, aneurysms, advanced explosive cancers, and myocarditis in apparently otherwise healthy

vaccinated children and explosive cancers, and myocarditis in apparently otherwise healthy vaccinated children and young adults. People are dying suddenly and unexpectedly in droves, leading to the "inexplicable" phenomenon of Sudden Adult Death Syndrome (SADS). Yet, is this really a mystery?

Looking into the PSA vital statistics, there were no excess deaths in 2020! The excess deaths somehow started in March 2021 with the rollout of the COVID-19 vaccines, and then escalated. Sharp increases in deaths coincided with intensified vaccination drives nationwide. Not only that: there were 10.7% fewer babies born in 2021.

The DOH assures the Filipino people that the COVID-19 vaccines are safe and effective. If this is so, why are there more than 105,000 reported cases of adverse reactions? If the vaccines work, why are people still dying of COVID-19? Why did deaths increase immediately after the vaccines were rolled out? If the vaccines are safe, why are more people dying than ever before?

Why has the PSA not released complete population data from October to December 2021 and why is it months delayed in releasing the 2022 data? Why is the FDA more than a month delayed in releasing its latest AEFI reports? Why isn't the DOH tracking and reporting the COVID-19 vaccination status of all COVID-19 hospitalizations and deaths? Why are sudden deaths in young previously healthy fully vaccinated people being brushed off by our health authorities as coincidental?

The Filipino people are dying in droves. **THIS IS THE REAL EMERGENCY.**

Mr. President, you are the father of our nation, and we look to you for leadership and protection. We ask you to protect and defend the Filipino people from what is looking like genocide. We call for an urgent investigation into the relationship between the excess deaths, the declining births, and the COVID-19 vaccines. We call for an immediate halt to all COVID-19 vaccination programs until such time that the safety of the vaccines has been clearly established. Australia has lifted vaccine mandates even for health care workers. The UK has rolled back its vaccine recommendations for pregnant and breastfeeding women and for children ages 5-11 years. **Prudence requires that we do no less.**

Existing laws protect our rights as individuals regarding our bodily autonomy, privacy, and health status. Please do not allow the World Health Organization, pharmaceutical companies, and other international and local corporate interests and self-serving individuals to usurp these God-given rights. We urgently appeal for you to officially and unequivocally end the state of COVID-19 public health emergency on September 12, 2022 and to free our people from the bondage of COVID-19 tyranny. We look up to you, Mr. President, to stop the harm, save the Filipino people and usher in the official beginning of our nation's healing and recovery.
