

LOCKNCLIMB®

Ergonomic Safety Ladder System for Bell 206 Helicopter

A) 10HELICADET

120" tall. Slanted profile allows easy reach to service rotor blade assembly. Elevated fixed cadet base fits over runners for stability and access. \$3454.

B) 6HELIPYLON

72" tall. Profile allows easy reach to engine and transmission, tail rotor, etc. Folding pylon base provides stability and decreases storage footprint. \$2622.

C) 32LNCHELIPLT

Wide standing 32" high platform inside a safety cage, yellow safety handrails, slip-resistant deck and treads. ANSI 14.7 OSHA 375 LB. \$4795.

When extended and brackets locked into place, the folding pylon base fits neatly over the runners to allow close working access on the ladder.
