

# LOCKNCLIMB®

## Ergonomic Safety Ladder System for Airbus HS125-350 Series

### A) 8HELIPYLON

96" tall. Slanted profile allows easy reach to service rotor blade assembly. Folding pylon base fits over runners for stability. \$2866.

### B) 6HELIPYLON

72" tall. Profile allows easy reach to engine and transmission, tail rotor, etc. Folding pylon base provides stability and decreases storage footprint. \$2622.

### C) 32LNCHELIPLT

Wide standing 32" high platform inside a safety cage, yellow safety handrails, slip-resistant deck and treads. ANSI 14.7 OSHA 375 LB. \$4795.

When extended and brackets locked into place, the folding pylon base fits neatly over the runners to allow close working access on the ladder.
