

Cold-Plus Residential Warranty Guarantee

SOLID START, Inc. hereby offers the following limited warranty on any residential air conditioning compressor in which Cold-Plus is installed. If, within the warranty period and warranty terms set forth below, a residential air conditioning compressor fails for any reason, SOLID START, Inc. will replace the compressor with a new comparable compressor at no charge to the customer. Labor costs to install the compressor are covered by this limited warranty.

The warranty period is Fourteen (14) years for a new air conditioning unit. If Cold-Plus is installed in a used residential air conditioning unit, and the used unit is in good working order as attested to by a licensed HVAC contractor at the date of Cold-Plus installation, the limited warranty shall be the number of years remaining after the age of the unit has been subtracted from fourteen (14). Example: an Eight (8) year old residential air conditioning unit in good working order will have a Six (6) year limited warranty remaining. For this limited warranty to be valid, the ***Residential A/C Compressor Warranty card*** must be returned to SOLID START, Inc. within Sixty (60) days of the date of the Cold-Plus installation. ***The Residential A/C Compressor Warranty card*** must contain the name and address of the residence owner; the manufacturer of the air conditioning unit in which Cold-Plus was installed; the serial number of the air conditioning unit in which Cold-Plus was installed; the installation date; and, the licensed HVAC Company doing the installation of Cold-Plus. The owner of the residence and the licensed HVAC technician doing the installation must both sign the ***Residential A/C Compressor Warranty card***.
