May 3, 2017

Dear Phil

Please accept this letter as confirmation that based on information received from Burman Energy and Veridian Connections (our power utility), savings as a result of the EnerFreeze/Cold Plus application into one of our chillers resulted in a 10.84% energy savings.

Burman Energy has approved our incentive application and payment on this project of 50% of the project cost based on our submitted Measurement and Verification plan and subsequent results, and is satisfied to the longevity of the EnerFreeze/Cold Plus product.

EnerFreeze has been accommodating and have provided us excellent service and look forward to working together in the future.

Scott Wilkens
