

# **CONTRAC All-Weather BLOX**

## **Outstanding Rodent Acceptance**

CONTRAC All-Weather BLOX is a single-feeding anticoagulant rodenticide containing the active ingredient, Bromadiolone. CONTRAC BLOX is specially formulated with an optimal blend of food-grade ingredients and a small amount of paraffin. Time tested rodent acceptance and control due to its palatable formulation, CONTRAC BLOX is a clean-out and maintenance bait to control commensal and non-commensal rodent species including warfarin-resistant Norway rats, meadow voles and *Peromyscus*.

For ease of use, a hole in the center of the BLOX lets technicians place it on bait securing rods in tamper-resistant bait stations, or nail/wire the BLOX in place. CONTRAC 28 gm BLOX work well in tight places, nailed to rafters or ceilings, or in Bell's tamper-resistant bait stations.

- Palatable, yet weatherable, CONTRAC works well in wet and dry conditions.
- Multiple edges that appeal to a rodent's desire to gnaw.
- Bait shyness is not a problem with CONTRAC because mortality occurs a few days after bait is consumed.
- The antidote, Vitamin K1, is readily available.
