

Lawnstar/Bifen LP Granules - 0.2% - 25 lbs.

One 25lb bag of Bifen Granules will cover about 5,000 to 10,000 square feet and is safe for non-target animals such as pets, mammals, birds, and reptiles. Bifen LP, with its unique sand core structure, is used to control ANTS (EXCLUDING CARPENTER, FIRE, PHARAOH), BILLBUGS, CENTIPEDES, CHINCH BUGS, CUTWORMS, FIRE ANTS, FLEAS, LEAFHOPPERS, MEALYBUGS, MILLIPEDES, MOLE CRICKETS, PILLBUGS, SOWBUGS, TICKS, WEEVILS, and almost all other insect pests.

One application of Bifen LP will provide a 2-4 month residual; the average residual is 2- 3 months. It may be applied by a spreader or by hand. It can be spread over the lawn or around your house's perimeter. The initials "LP" stands for lawn and perimeter.

Bifen LP has no odor and the low application rates make them cost-effective as well.

- Bifen LP releases chemical over time as it rains.
- Broadcast Bifen LP Granules by a [granular spreader](#)
- Once the Bifen Granular is inside the soil, it will protect by killing the pest as well as preventing pest problems.
- As an outside perimeter treatment, apply Bifen LP around your home as a 5-10 feet band. As a general broadcast, Bifen LP may be spread over the entire lawn to combat such insects like chinch bugs, fleas, mole crickets, armyworms, cutworms, sod webworms, mealybugs, fleas, and fire ants.
- A normal application would be around 4 pounds.
