

DIRECTIONS FOR USE IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

PT Ultracide at the rate of 14 oz for up to 1827 sq ft. Carpeted areas may be vacuumed before treatment and after treatment has dried. Treat infested areas or areas which could be infested; these include rugs, carpets, upholstered furniture, pet beds and pet resting areas. Hold can at arms length and direct spray toward the area to be treated. Use a sweeping motion to apply product and back away from the treated area while holding the can 36 inches away from the surface being treated. An area of 80 - 100 sq ft can be treated in approximately 10 seconds with Ultracide. When treating upholstered furniture, treat under cushions and areas where flea development occurs. Cover aquariums and fish bowls and remove birds from the area prior to treatment. Treated areas should be vacated during application. **TO CONTROL TICKS AND FLEAS:** Old bedding should be removed and replaced with fresh, clean bedding after treatment. Pets should be treated with a registered product for flea and tick control in conjunction with this product. **SHAKE WELL BEFORE USE.** PT Ultracide kills fleas and prevents flea infestations for a full season. Adult fleas may be seen in the treated areas when brought in on infested animals or when adults emerge from pupal cases; however, a population will not develop in the treated area. In transportation equipment, certain plastics may be whitened or dulled. Apply only to carpets and cloth upholstered areas, or test an inconspicuous area before treating.

Except for the applicator, DO NOT PERMIT HUMANS OR PETS TO CONTACT TREATED SURFACES UNTIL THE SPRAY HAS DRIED.

DO NOT TREAT PETS WITH THIS PRODUCT. NOTICE. PT Ultracide has been tested on several types of carpet, fabric, and other household furnishings without adverse effects. In a few instances, waxed surfaces have been whitened or dulled. Because of the wide variety of floor types and finishes, treat a small inconspicuous area before treating the entire area. Avoid contact with antique finishes. In a few instances finishes have been whitened or dulled. Holding the can 36 inches away from the target surface normally prevents any whitening from occurring.
