Formulation	Professional Product
NOT FOR SALE TO	MA, MN CT, IN, NY, VT - Restricted to Commercial Applicators Only
Shelf Life	5 years (approximately)
Time to Kill	May take up to 90 days to kill termites depending on the colony size
Shipping Weight	1.59 lbs
Manufacturer	Control Solutions (Mfg. Number: 82003598)
UPC	072693035980
Details How Taurus SC Works EPA Registration	53883-279

Taurus SC Termiticide contains the same active ingredient as the popular Termidor SC, the non-repellent Fipronil. Fipronil belongs to the phenylpyrazole

family of insecticides, acting primarily as a GABA inhibitor, attacking the central nervous system of target pests. Fipronil is extremely effective, yet it works slowly enough on target insect pests to take advantage of the natural food-sharing habits of social insects, particularly termites and ants. This means that the fipronil in Taurus SC spreads throughout the entire colony, killing not just those insects that come in contact with the direct spray or residual, but all the others they contact, resulting in colony elimination.

WARRANTY AND CONDITIONS OF SALE - Seller makes no warranty, expressed or implied, concerning the use and handling of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling are contrary to label instructions.
