PLANT ME

Plant Shopping App

1. About

Overview

This is a plant buying app where you don't have to go to a nursery to buy plants. You can order them by just sitting at your home. You get notifications on taking care of the plants.

Problem

Busy people do not have time to go and buy plants from the nursery. Plants die due to lack of knowledge on maintenance. For accessories, they have to go to different shops.

Get started >

Solution

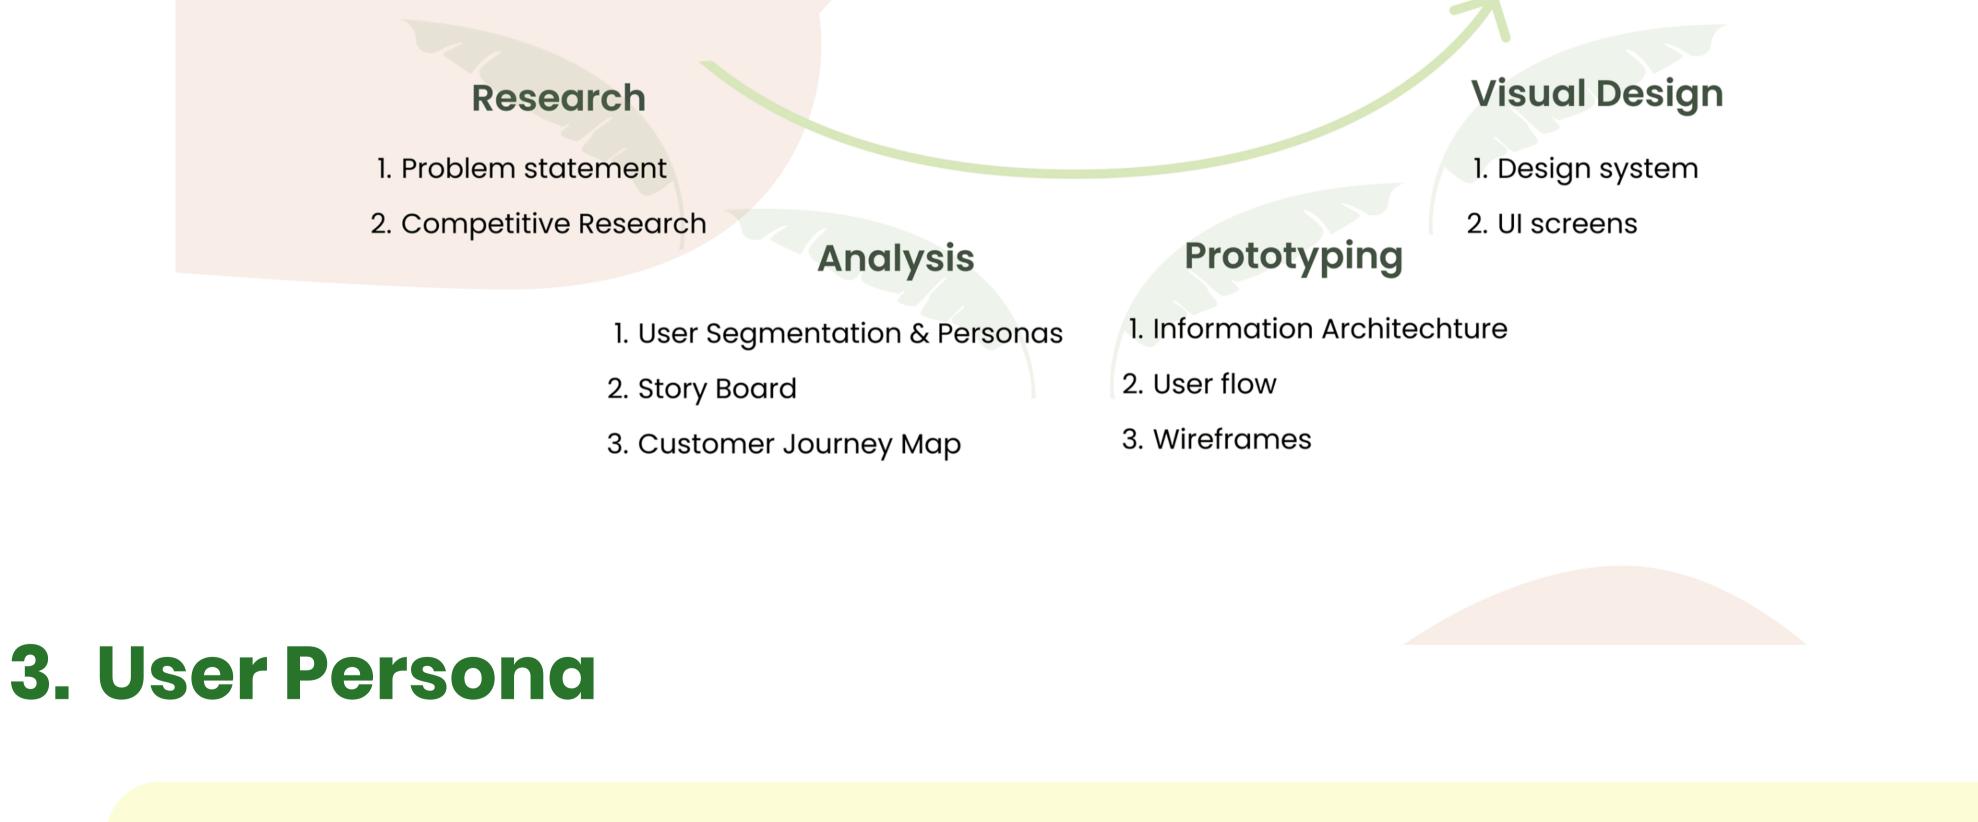

Providing an E-commerce application to buy plants online with wider options, providing user with care guidance in one platform.

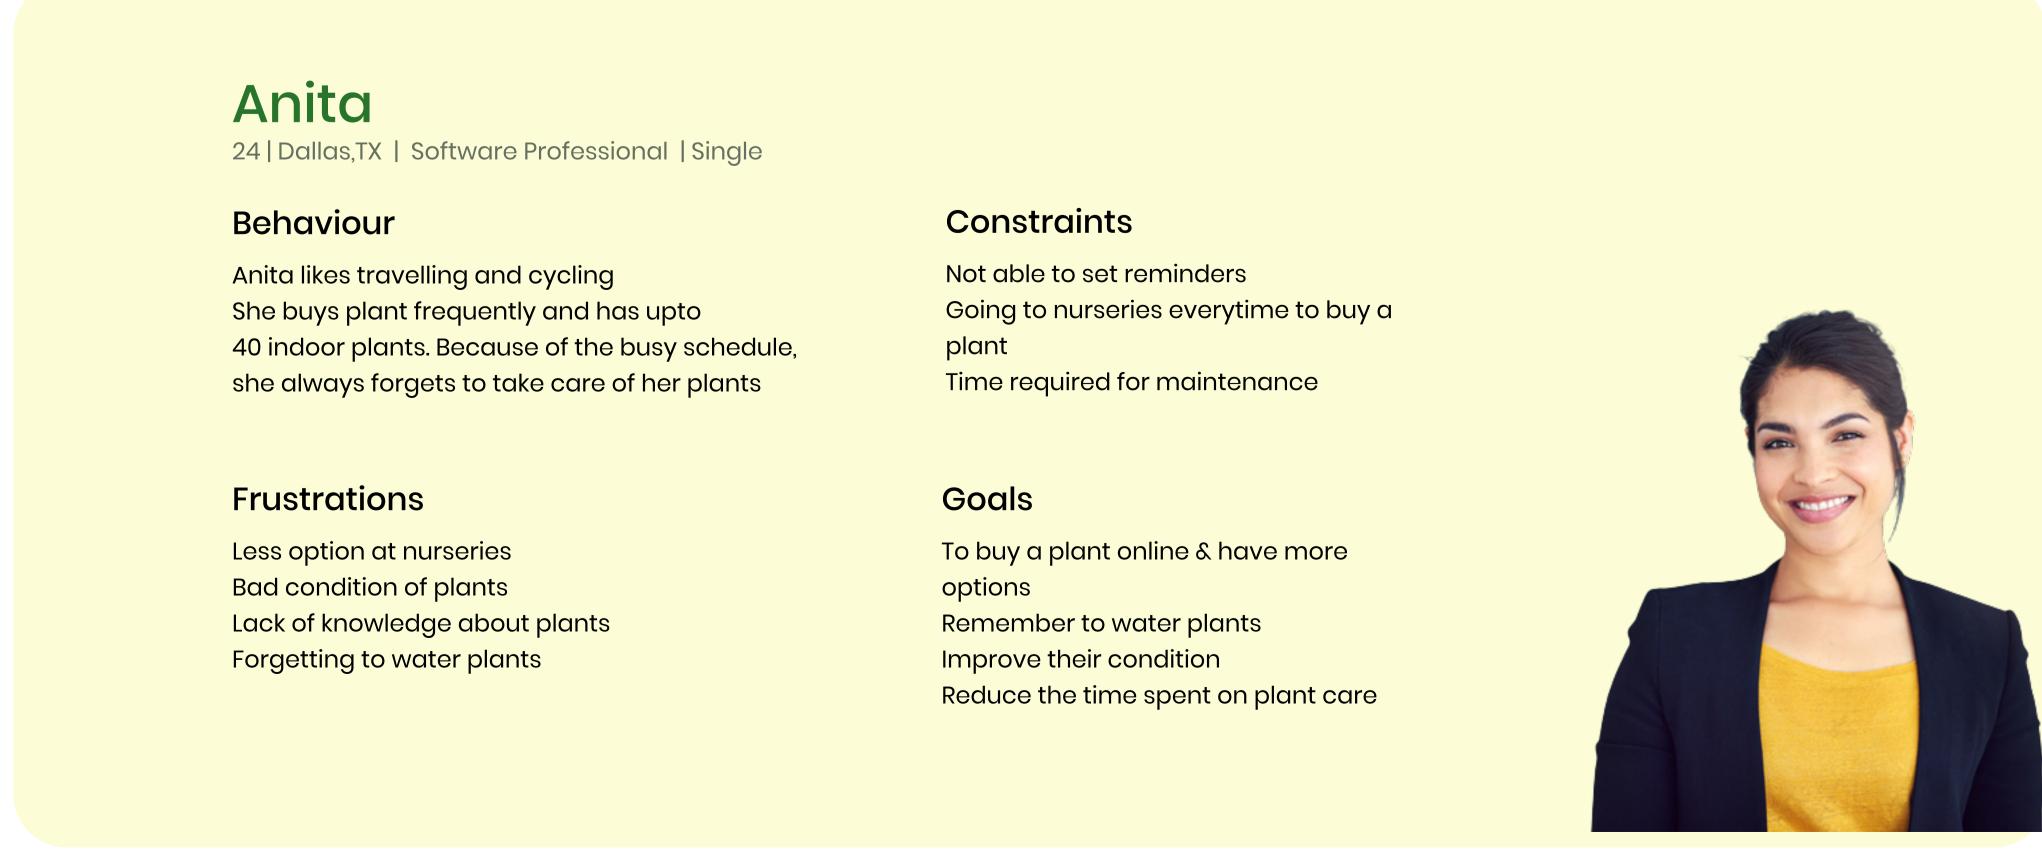

Key Features

- 1. Plant Identification
- 2. Care Reminders

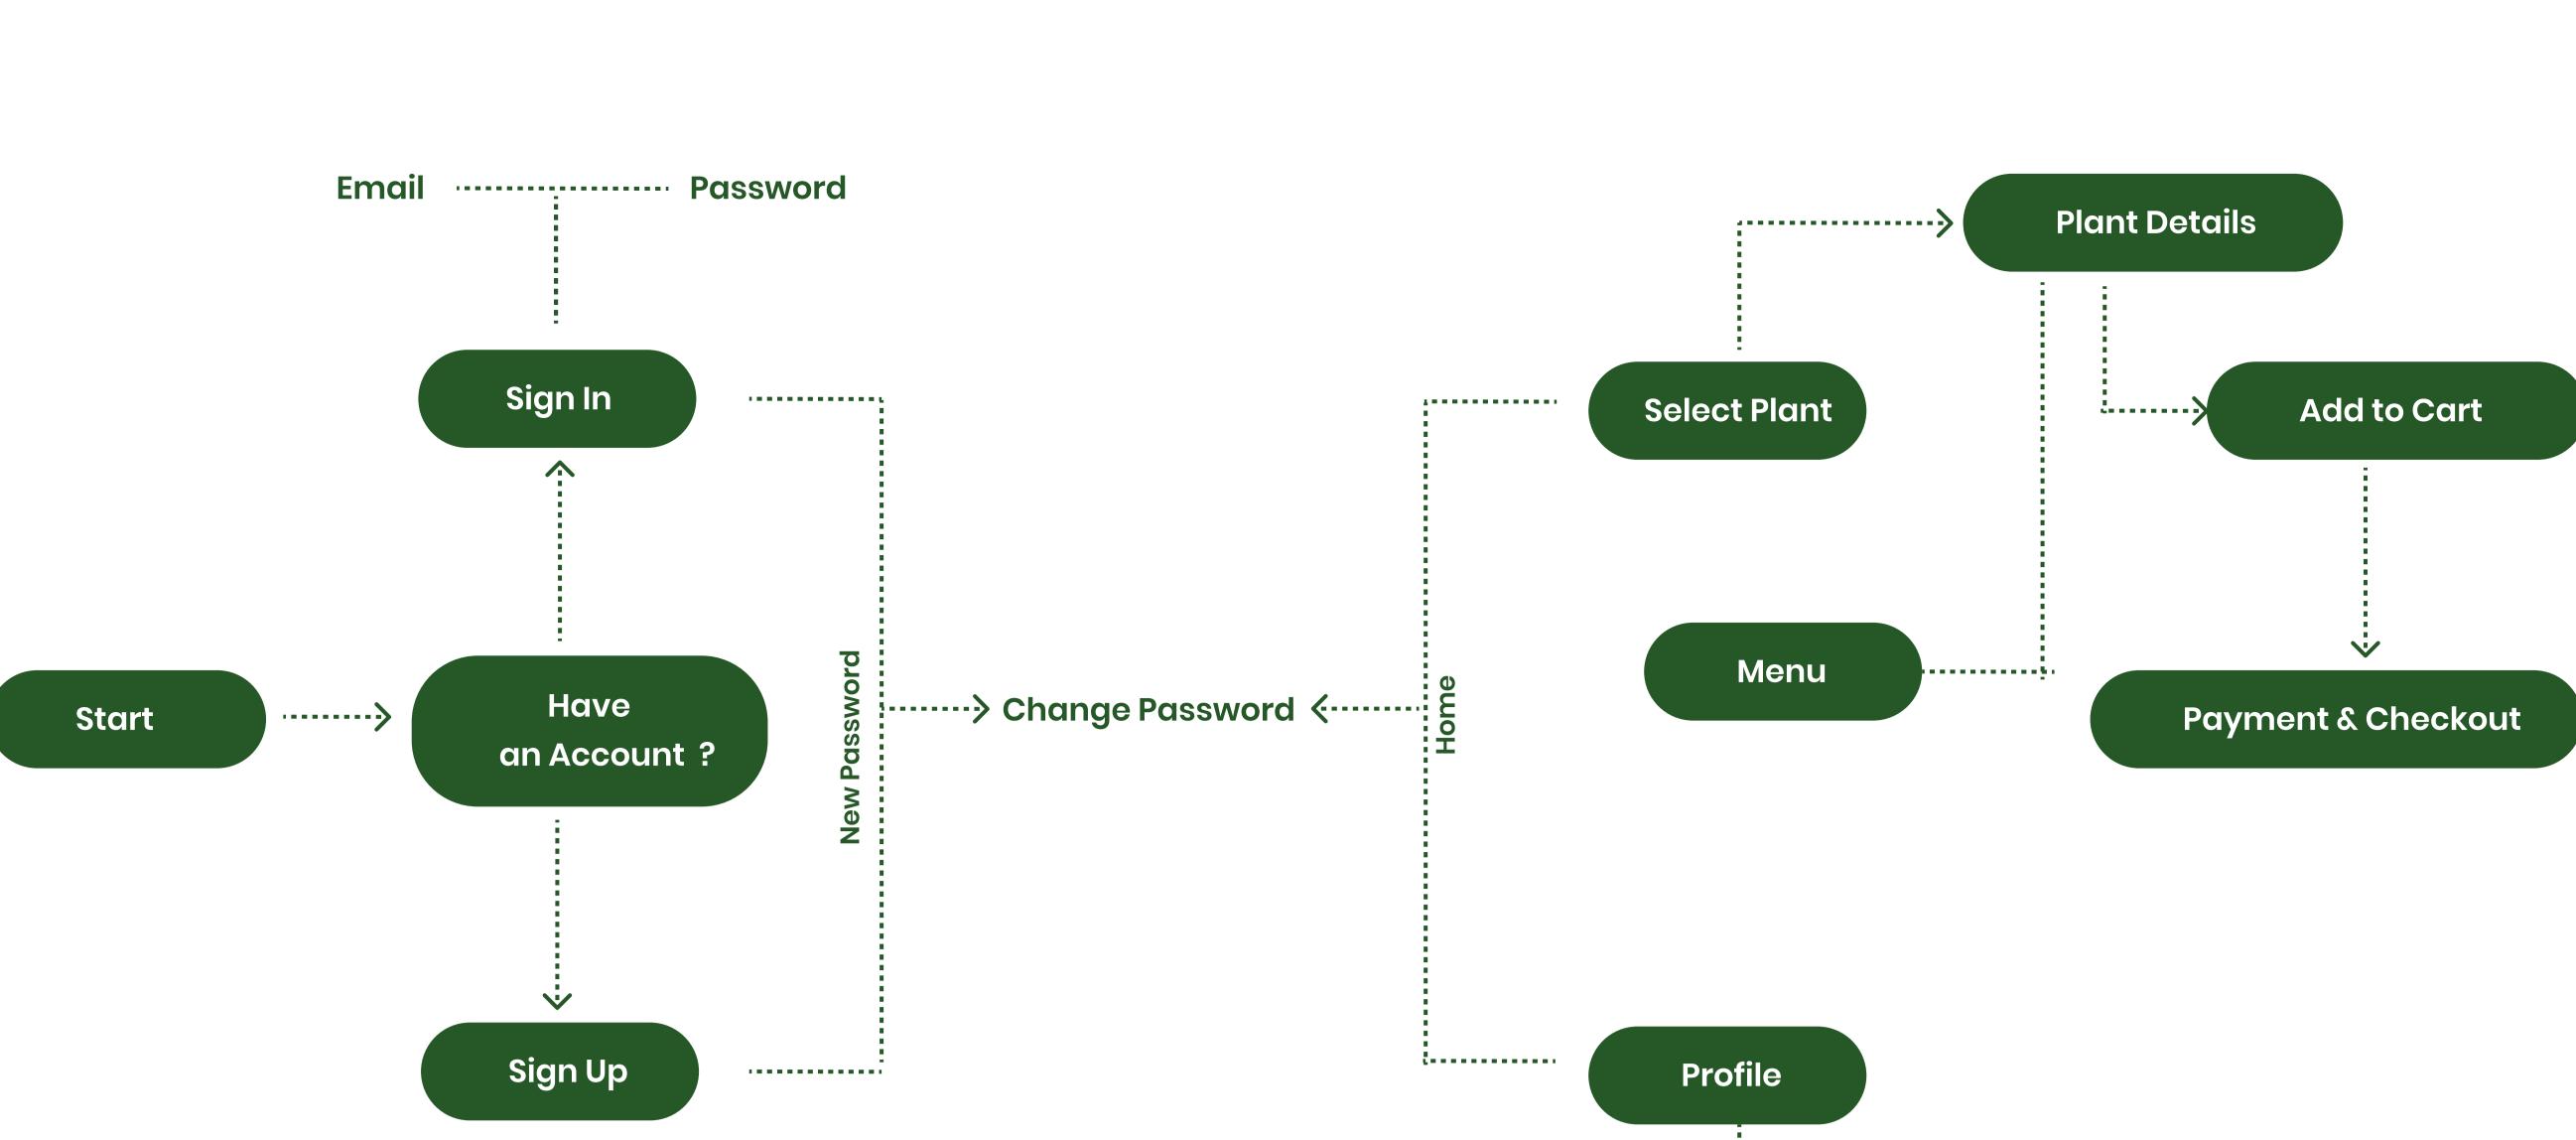

3. Buy plants onine

2. Design Process

4. User Flow

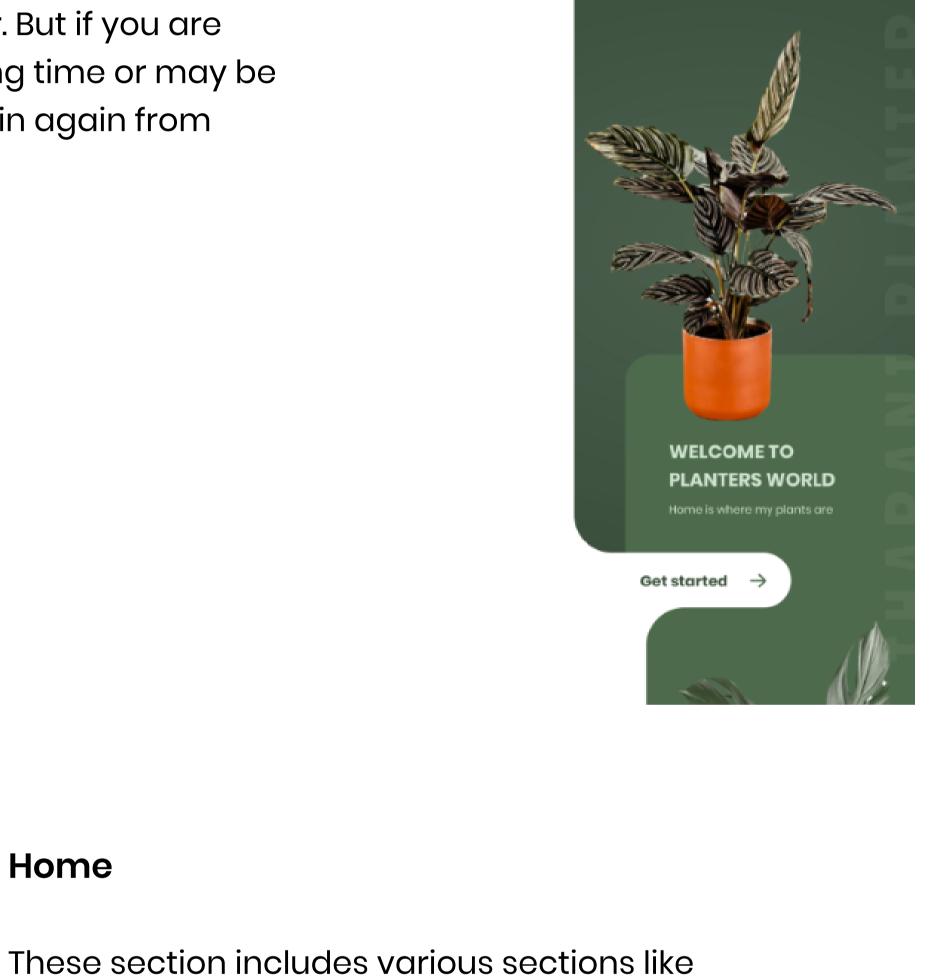

5. Design

These are one of the most important screens of a mobile app, here the registration takes place if you are a new user. But if you are already a user and coming to the app after a long time or may be

Onboarding

you have signed out from it then you have to login again from here

Settings and Reminders

Plant shop Search..

you will find some ways to do different tasks like opening camera account, checking your cart etc.

Home

In the top app bar ,included a search bar where the users can search the plant that they want to buy or check out. Other things like price, category of the plants are included

categories, popular selections and in the bottom bar

Checkout

buying the plants they want. In this section, all the information related to plant like category,price , how many times they have to

water the plants are provided.

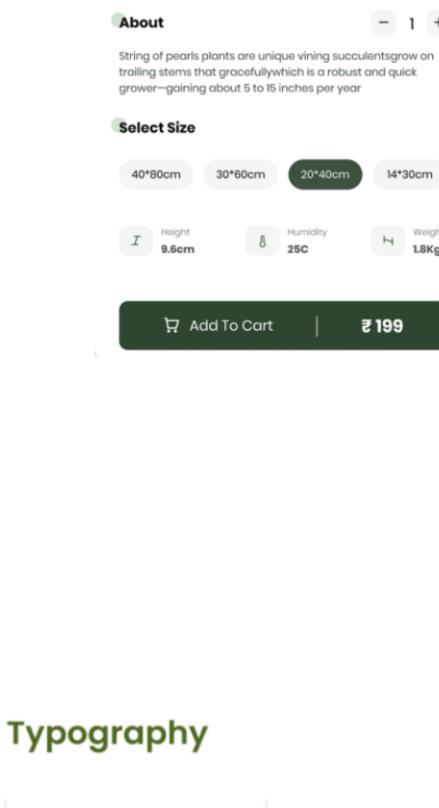

In this tried to solve one of the problems of the users were not able to manage their plants.

So to solve this problem,I included information like how many times they have to water plants, space needed and some description of them. After that, they can set reminder as well.
