At our core, HYPERLYTE is a team of innovators! We studied and researched event floor rentals currently available in the market and thought, we can do better!

We know the pain. We come from the special events industry! We listened to feedback from event rental partners who are tired of losing revenue due to damaged floors being returned after being placed on damp surfaces or left out in the elements. We listened to event team members who have suffered injuries installing cumbersome and heavy wooden dancefloors. And we heard from disappointed customers whose events were ruined or moved at the last minute due to damp surface conditions. From there, we committed to developing an innovative solution to not only address these issues, but to shatter the standards of the industry.

Our durable, lightweight, waterproof and easy to assemble event floors are the result of our hard work and dedication. We know that **HYPERLYTE** will become not just your first choice, but the **ONLY** choice for event dancefloor rentals.
