### Performance By...

Growers wanting a hybrid to plant across all their acres can look to G01D24. An excellent option for all soil types, it performs best at higher populations due to its semi-determinate ear. Suited for any cropping rotation, it excels on rotated acres.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
