G09E98-3122 E-Z Refuge

HIGH-YIELDING GENETICS THAT PERFORM ON YOUR BEST ACRES

- Outstanding stalk strength with a strong disease package
- Well adapted in and north of zone
- Best performance at medium to high plant populations

Performance By...

G09E98 excels on medium- and fine-texture soils. Because of a semi-determinate ear type, G09E98 performs best at above average plant populations (34,000 and greater). G09E98 will perform well in any cropping rotation.

1-9 Scale: 1 = Best, Tallest or Highest; 9 = Worst, Shortest or Lowest; (-) = Not Available, NA = Not Applicable.

Published June 15, 2017. For use until July 01, 2018.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
