"WHERE ARE MY GLASSES?"

Eyewear users can generally be divided into two categories: those who meticulously care for a single pair of glasses for years, and their opposites, who can't go ten minutes without misplacing them.

The founders of Flippan'Look, a Madrid-based brand, fall into the latter category, which inspired them to create a modern and playful solution to this common problem.

Flippan'Look is an innovative brand that combines fashion and functionality with a surprising twist, delighting the bold and trendsetting crowd. It's a chic and modern reinterpretation of the 19th-century lorgnette.

The designs are refined, drawing inspiration from Art Deco, Art Nouveau, and tribal geometries, among others. Positioned at the crossroads of jewelry and optics, the brand's pendant-glasses are crafted using high-quality optical materials, offering a product that is unique, fun, and original.

THE PRODUCT

Flippan'Look was born from the need for functionality but without compromising style and elegance. The concept (as suggested by its name) revolves around wearing a necklace that transforms when needed: just flip and look.

Lenses are the unifying thread and the common element across all collections. Their design ensures that functionality is always in perfect balance with aesthetics: the piece must be both beautiful and practical.

When folded, the frame forms a medallion and can be unfolded as needed, adapting ergonomically to the face.

The medallion surrounding the lenses evolves with each design, while the frame remains a constant base. Around this foundation, unique designs are developed, tailored to trends and individual styles.
