

The process of installing expert advisors on Metatrader 5 is very similar to installing MT4 EAs. The whole process should take no longer than 5 minutes to complete.

10 Steps to Installing Metatrader 5 Expert Advisors. (see example below)

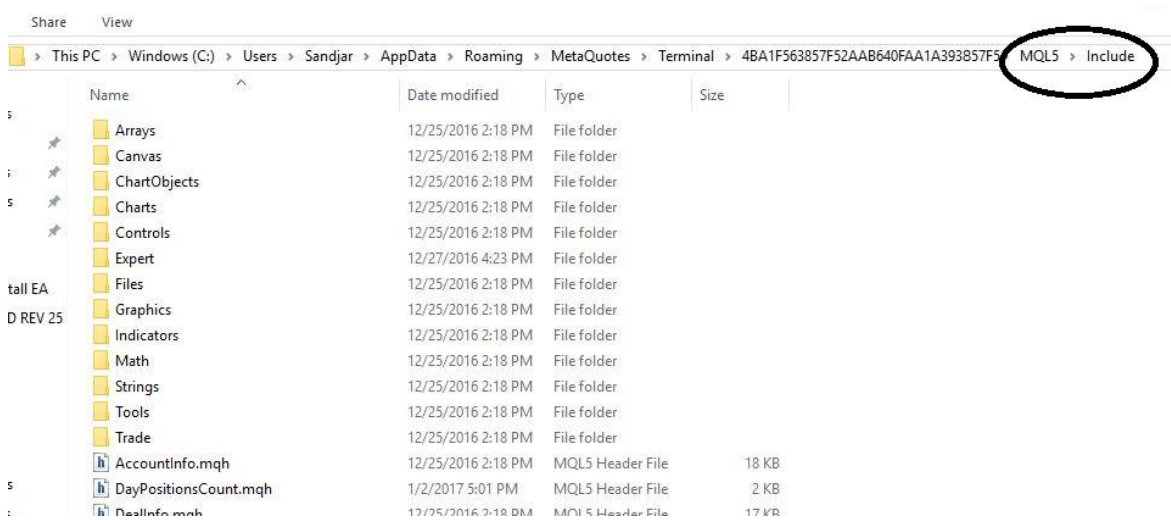

1. Open Metatrader 5 platform.
2. Download and save your expert advisor (EA), indicator (if provided) and include (if provided) to your local computer.
3. Copy and paste the MT5 “Expert Advisor File” into this folder: Go to > Top Menu > Open Data Folder> MQL5> Experts> Advisors.

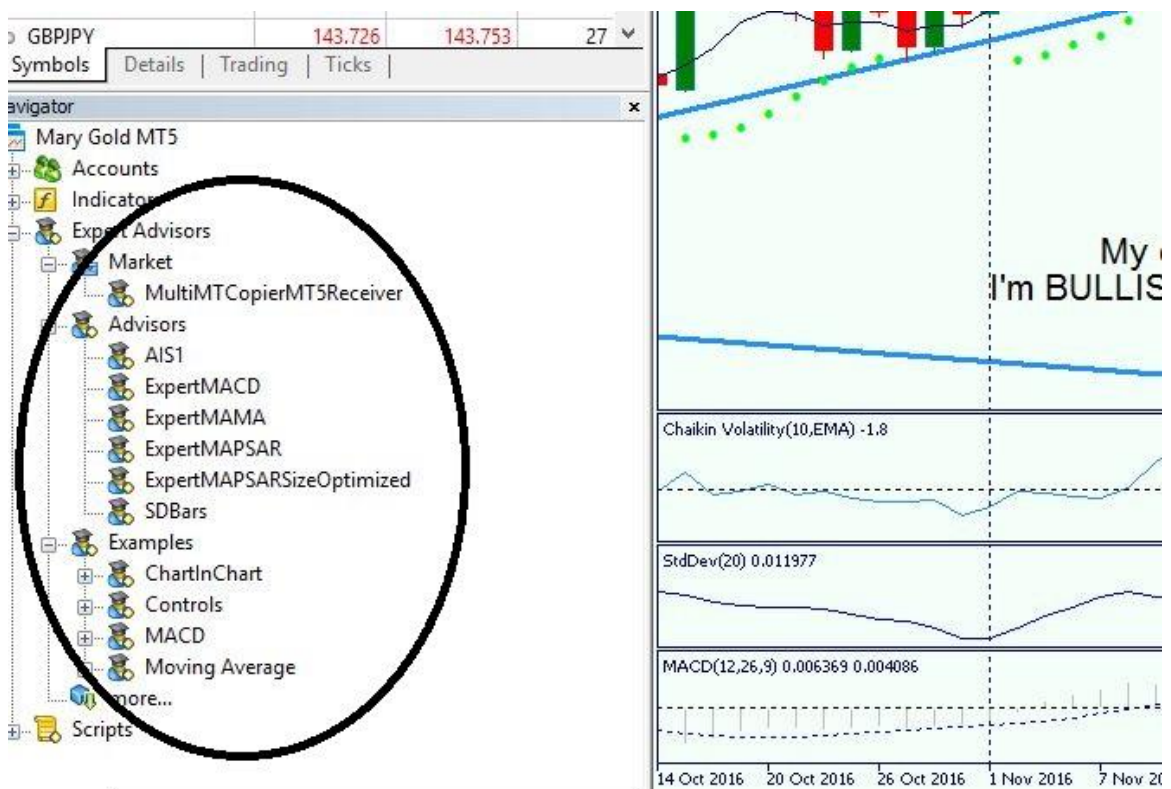

4. Copy and paste the MT5: Indicator File” into this folder (if provided): Go to > Top Menu > Open Data Folder> MQL5> Indicators.

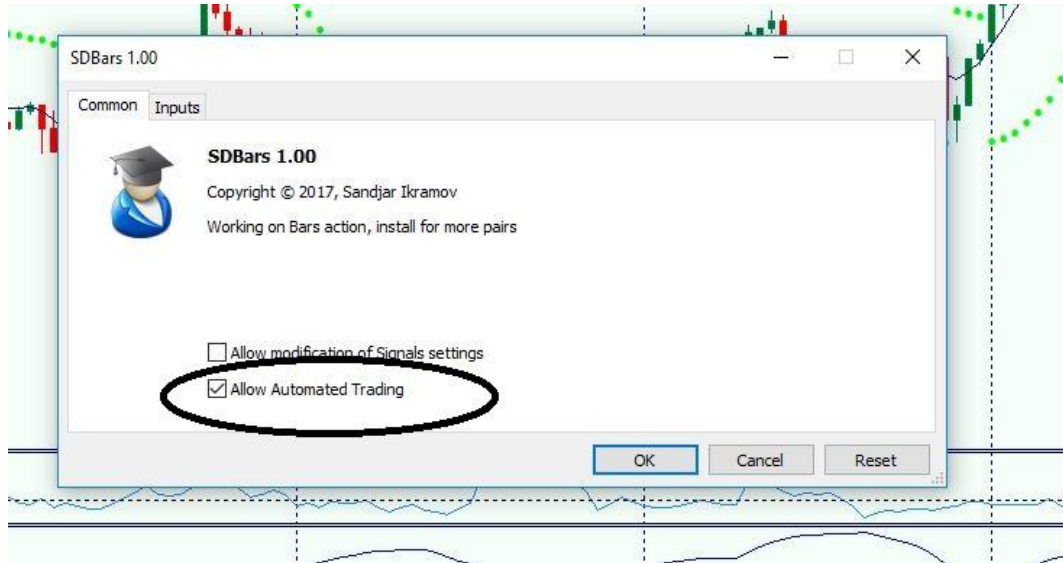

5. Copy and paste the MT5 “Include File” into this folder (if provided): Go to > Top Menu > Open Data Folder> MQL5> Include.

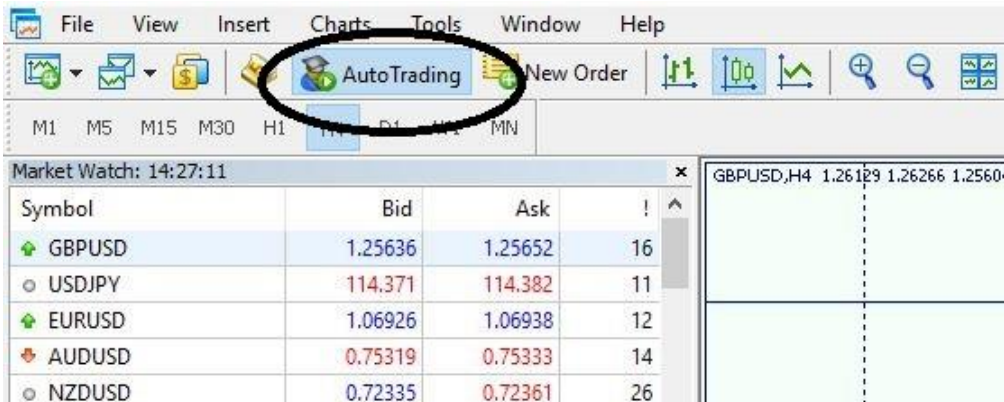

6. Restart Metatrader 5.
7. To access MT5 expert advisors: Go to > Top Menu > View > Navigator > Expert Advisors.

8. Drag and drop the EA from the Navigator window to the desired forex chart you want to attach it to. Then a pop up screen will appear.

9. Check “Allow Automated Trading” under the Common tab then check Settings under the Input tab and click OK.
10. Push the “Auto Trading” button on the top menu to enable auto trading.

11. If all OK should be like this:
