As a family run business focused on creating quality spaces, Silverstone Investment Group is dedicated to designing and building unparalleled homes in premier neighborhoods with a passionate team. The Washington, DC-based boutique luxury real estate development firm prioritizes responsible and sustainable development for maximum positive impact in the community, above and beyond the industry requisites.

Silverstone is led by CEO Karan Keith Agarwal, a former political consultant who, after working at two blue-chip firms in DC, realized his calling was innovative luxury real estate. Taking cues from his father's international business, Agarwal connected with Arcadia Design's Jim Foster and Tarpon Construction's Chris Brauss. Together, they collaborate and leverage their expertise and panache toward creating exquisite homes.

The Silverstone team's attention to detail, cutting-edge designs and remarkable build quality are second to none—a multimillion-dollar mansion and a condominium studio unit are both crafted with comparable exemplar with the singular objective of value addition and desirability.

Backed by an exceptional team and with Kyra Erika Agarwal at the helm of sales and marketing, Silverstone's 2021 purpose of action is defined by 15 in 15—bringing 15 ultra-luxury condos to the coveted Logan/ Dupont/West End neighborhoods in the next 15 months, that are projected to set records in terms of design, functionality and price.
