

Common Supplies for Research Peptides

To safely and effectively utilize your research peptides, the following items are commonly required:

- 1cc Luer Lock Syringes
- 3cc syringes for ease of reconstitution
- Bacteriostatic Water (typically purchased in 10ml vials)
- 25g (for drawing) & 30g (for injection) Luer Lock Needles (5/8 inch recommended)

These supplies are widely available on major online marketplaces such as Amazon and other medical supply sites.
