

The Wasel's Album Report

Name of album: (Echoes of Eternity)

In this report I'll be reporting everything that happened during the album, and make it public to the audience, any publishing outside of (azularcade.com) will be in a legal result by the Azul Arcade's legal team & Advisory.

- **New World:** The piece was composed in **august 11th of 2021**, "New World" was going to be set as an animation soundtrack, but due to changes in projects, relations, and personal situations was finally set up to be the opener of the album.
- **Hero In Our Hearts:** "Hero In Our Hears" meant to be a song inspired by hero movies or shows, trying to give a style or inspiration of the Anti-Villain "Homelander" or any other Amazon TV Hero Show. Song composed in **October 19 of 2022.**
- **Kukulcan:** The Symphony is a combination of multi-percussion sense and an intrigue, "Kukulcan" was made for the same project that the piece "New World" was going to be meant for, the word "Kukulcan" mean "Plumed Serpent" and it's part of the Mayan mythology giving a meaning for the powerful god, "Quetzalcoatl". **November 08 of 2021.**
- **Akatsuki:** A short song but with a deep meaning for me, this song was **created in September 02 of 2023**, I never created a song like that in my life, with effort I started composing this during my move into Nashville, TN, with that said it brought me a nostalgic feeling while I hear this song.
- **Fall:** What's your wish for winter? Mine was to have brand new Ideas for composing, during my brand-new months with no high school with no friends, I finally finished my course in college! And gained experience in composition, but also gained more experience than what I expected, and for some destiny reason I blocked my mind out of music, and couldn't compose anything, but during Christmas days I started composing "Fall" I certainly was sure that my soul would be stronger than my mind, so I started freestyling in the scoring program until I finally composed a short piece with a beautiful melody and some powerful 16th note spiccato's . **Created on December 20th of 2023.**

- **Symphony of tears:** The piece is a nice symphony with a Synthesizer add-on but due to remastering and production my expectations weren't enough to publish it in this album, I will publish it with the original sounds and amplitudes once the album is published, sometime in the late 2024. Song created on **November 16 of 2023**.
- **The Power of a King:** One of my most recent string chambers, nothing special but it will be replacing "Symphony Of Tears" due to a technical problem with the synthesizer "Super 8", **Created on February 23rd of 2024**
- **The Unrevealed Kismet:** One of the most meaningful songs out of all of em', Why? In March 15th In my high school senior year, I was in a relationship with the most nicest girl iv'e ever met but due to my lack of attention and non-mature decisions I've caused the end of my relationship with this girl that will be known as "L" due to my decisions she betrayed my trust with my own best friend... during my rupture, a girl that she'll be known as "Z" helped me out with support and with her family she got me through everything risking her own friendship with everyone until my graduation, In honor of her and other 2 friends known as "TJ" (Initials) and an ex-friend "AJ" (Initials) I wanted to show them how much im thankful for their actions. Nowadays I have 0 contact with every single person but Im sure that they're okay and that they'll have a bright future, Once again... Thank You. **Created on March 20th of 2023**.
- **My Own Mirror:** Is a peace also created for the animation project I had in mind, it consist on intrigue and sadness with a maningful feeling of melody, **Created on October 10th of 2021**
- **The Last Ballad (Full Chamber) :** The Last Ballad is a piace that it has a a lot of meaning throughout my career, is a joyful melodic piece, with some 4/4,3/4, and 6/8 timing signature, it brings joy and happiness to our feelings, the last ballad was created as a gift for a child that just turned 3 back then, the mexican religious tradition of a kid who turns 3 is to make them a big celebration in meaning to welcome them to their childhood and one of the traditions of the celebration is that the kid has to dance a ballad with their parents, like a quinciañera. Anita if you read this one day, this song is for you and I hope you can dance this once you turn 15 and you have your quinciañera! my meaningful sister. (Created on January 18th of 2024)

- **Memories:** Another song for the animation project, this piece was created and composed back when I started composing but also was finished in 2024, since I didn't know what else to add, after 3 years I can finally said that it's acceptable to bring it to light. **Created on December 12th of 2021.**
- **Echoes of Eternity:** The main featured song of the album, this piece contains the title of the album since it's the main song of it, I decided to compose this song since I needed a star closer, and decided to compose this song, it cosist some melodic orchestration and motivational percussion movements that makes the whole song sound that it came out from an emotional anime, Echoes of Eternity piece was inspired on the successful song "a Nostalgic Winter" by Jordy Chandra, in representing a beautiful feeling and even if I exagorate, make you cry. **Created on August 17th of 2024, 7:36:22 PM.**

Index:

In conclusion, thank you for all the support I receive, my small community has been really supportive and trust me right now I just want to throw myself to bed and never wake up again and feel that sleep is my only way to scape reality, but here I am still strong and with attitude to keep working on what I love, my real life people are sometimes a pain in the butt since I just don't want to be bothered on my stuff or because I might be doing something that is out of the limitations of someone, clear example my parents... but even my parents think that music it's not a real job I sometimes think they're in the right, I even think that I'm the black sheep of the family, but all this pain, feelings that I carry on, I transpose them into melodies and... that's something I still want to make. So, thank you Mom, Dad, M & Family for being there even though it looks like is not, I know you will be there for anything, and I'm sorry... I'm sorry for being myself, Because I'm... I'm Me.
