# LASH LIFT/TINT

## Eyebrow Lift & Tint After Care

### PREPARING FOR YOUR LASH LIFT/TINT APPOINTMENT

Please make sure to arrive without contacts, concealer OR eye makeup (mascara, eyeliner, eyeshadow etc.) on the day of your appointment. Avoid curling your natural lashes with a lash curler for 24 hours prior to your appointment.

The Lift treatment works by boosting and lifting each individual lash to its full potential, then tinting them for a thicker, darker, and more dramatic looking lash. Results last 6-8 weeks or until your eyelashes have naturally grown out.

You can wear mascara after 24 hours.

Because it is just your natural lashes being curled, you're free to use whatever eye makeup you wish. You just must wait 24 hours.

Do not use a waterproof mascara, as the chemicals used to make them "waterproof" can severely dry out your lashes. Using makeup and remover that nourish your lashes and are free from harsh chemicals will help strengthen your lash lift and tint and make the positive results longer lasting.

How do you take off mascara with a lash lift?

Remove eye makeup gently with non-oily remover. Gently brush your lashes daily with a lash brush. Use a mineral mascara with natural fibres for the best finish.

You will not be able to get your face wet for 48 hours following the procedure, so buy face wipes to clean your face and avoid the shower. \* Avoid getting water on your lashes 48 hours after treatment. \* No mascara, steam, excessive sweating, lash serums, lash extensions, or eye creams for 48 hours.

### WHAT NOT TO DO!

1. Rub your lashes for 24 hours.
2. Get your lashes wet for 24 hours.
3. Use harsh products or oil-based makeup removers.
4. Take a steamy, hot shower the first 24 hours.
5. No eye makeup - for 24 hours.
6. Use waterproof mascara's - indefinitely!! ...
7. Go swimming for at least 24hrs.
