## ABOUT THE COMPANY

Flydex automobiles founded on 13th June 2017 by Aakash Srivastava, is a Private Limited Company that focuses on manufacturing products for automobiles that reduce their fuel and energy consumption thus reducing pollution and providing a much greener solution to the automobile industry

## VISION

We are proud to be an company that is focused on reducing fuel and energy consumption without compromising the performance of the I. C. engine or any kind of rotary motion devices as well as making the emission of harmful gases lesser so that the fuel consumption is more environment friendly. Further, we also intended to help our customer to enhance their economic capacity by reducing to input cost to their vehicle and Home appliances. Our Research and development wing is sharply focusing on every aspects of energy saving and enhancing.

## MISSION

Develop innovative products which decrease fuel and energy consumption. Develop product which are compatible with I. C. Engines as well as on rotary motion devices. Low fuel and energy consumption to make environment less polluted and energizing. Increasing the engine life without affecting it's performance. Develop product of superior value but focusing on the customer problems.

## ABOUT PRODUCT

The present invented device is a milestone in the direction towards increase in fuel efficiency. There are many techniques and ideas available to do so. However by using the proposed device, it is easy to increase the mileage and power of any gasoline or petrol internal combustion engine. The present invention is a milestone in the field of automobile sector to reduce the effect of greenhouse gases and pollution level.

## OUR COMPETITIVE ADVANTAGES

Increased Fuel Efficiency

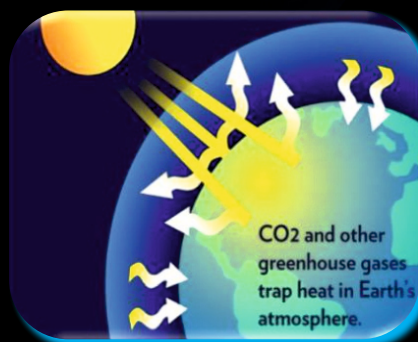

Decreased Temperature

Increased Power Output

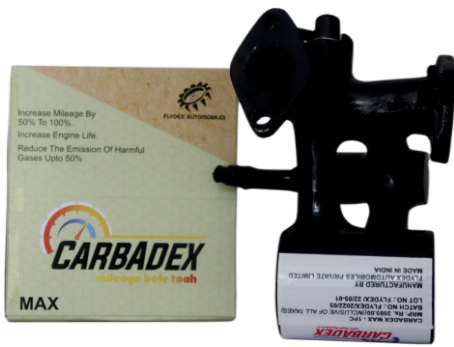

Increased Torque

Decrement in Production of Greenhouse Gases

Increased Mileage

**Carbadex Max**

**Carbadex Mini**

**ADVANTAGE OF CARBADEX**

Carbadex can make a 2-wheeler more fuel efficient by reducing the fuel consumption of engine by more than 150% - 200% and hence increase the mileage twice the present performance.

Carbadex helps to decrease the emission of harmful greenhouse gases and reduce the engine temperature also. So that servicing time of the engine is also improved.

**Foot Rest**

*All Range of high quality of bike foot rest pedal. Premium quality long lasting with easy fitment.*

**Plug Adaptor**

*Resistor spark plug adaptor manufactured from extremely durable phenolic resin and rubber. ceramic resistor puts optimum performance and withstand extreme heat ,vibration and is waterproof.*

**Indicator**

*Made of high quality material for long lasting durability. Waterproof universal side turning blinker.*

## CERTIFICATES AND AWARDS

- DIPP Recognized Startup (Registration No. DIPP4505).
- Recognised As A Startup Under Jammu And Kashmir Policy on 1st March 2019 (Recognition No. 1324914395)
- SMVDU-TBIC Recognised Startup On 13th June 2017.
- 3rd Position Begged In Green Energy, Startup Category At RISC 2018 at NIRDPR, Hyderabad.
- 2nd Position Begged In Product Stage Category At Up Startup Conclave-2018, IIM Lucknow.
- Selected For Investment By Startup Jalsa 4th Edition-2018 at Dharmshala.
