CONSTRUCTION PROJECT PHOTOGRAPHY

PROJECT GUIDE

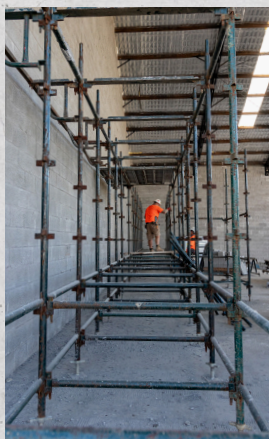

At Bewildered and Barefoot Photography, we capture more than just structures — we document the story of your project from the ground up. Our construction photography services are tailored to highlight the evolution of your build, showcasing the craftsmanship, progress, and behind-the-scenes efforts that bring your vision to life.

Whether you're after progress documentation, completion showcases, or milestone highlights, we offer high-resolution, professionally edited images that suit everything from marketing materials to internal reporting. We understand how to safely and effectively work on-site, capturing dynamic visuals without disrupting your workflow.

**WHERE CONCRETE
MEETS CREATIVITY**

**REAL BUILDS.
REAL MOMENTS.
CAPTURED RIGHT.**

We collaborate closely with builders, developers, project managers and contractors to ensure every image aligns with your goals — whether that's client transparency, quality assurance, or building your brand's portfolio.

Let us help you tell the story behind the steel, timber, and concrete — and all the hands that made it happen.

1.

BLUE FRAME BEGINNINGS

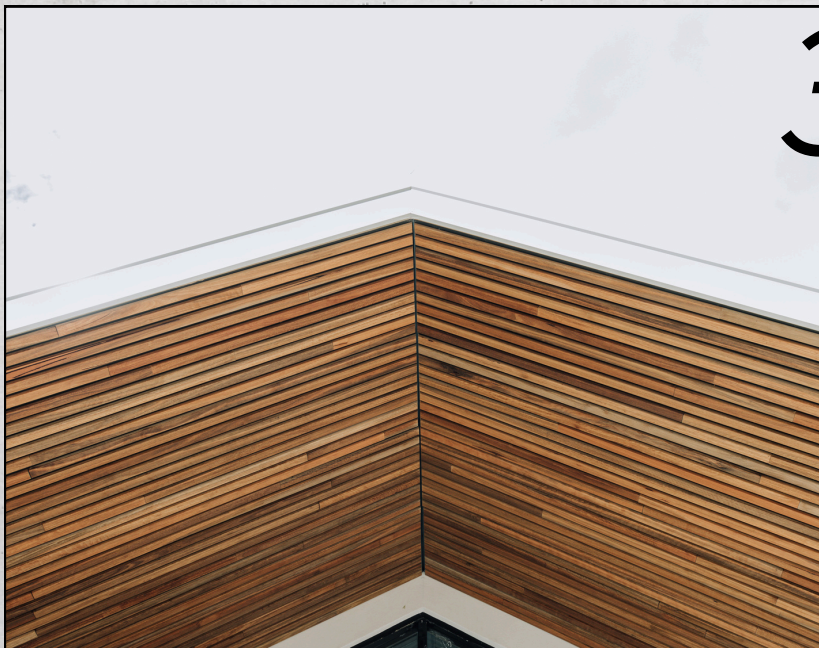

Laying the bones of something great. There's beauty in the blueprint — where vision meets structure and every beam tells a story.

2.

FROM BARE TO BUILT

Insulation in. Interiors taking shape. It's in these details where comfort, function, and future start to align.

3.

THE FINAL FINISH

From frame to façade — a completed vision now standing tall. A build captured in full circle, with every stage a story worth telling.

SERVICES INCLUDE:

- Groundbreaking & initial site documentation
- Ongoing progress photography
- Completion and handover photography
- Aerial & drone options available on request
- Before & after comparisons
- Detailed shots of workmanship, materials, and safety procedures
