

SPELLBOUND®

Reimagining patient experience

Hospital treatment can be scary or traumatic for some children. On-site therapists need effective and easy-to-use tools to support patients. **SpellBound** provides tools that reduce patient trauma and increase treatment quality.

Distract children during frightening procedures

Engage kids with their therapy treatment

Provide escape from an unfamiliar setting

“A child life specialist in the OR had a patient who was inconsolable. They pulled out the **SpellBound app** and the **Albert the Manatee book** and she immediately **stopped screaming** and yelling, **started interacting** with the book and was playing with it all the way into the OR until she got sedated to go to sleep.”
- J.J., Certified Child Life Specialist (CCLS)

Look for our new Quick Distract™ Cards!

These cards produce a virtual world around a theme (castle, undersea) with interaction-dense 3D scenes, sounds and animations.
