

# WHAT PEOPLE ARE SAYING

This is how you can find out at any given point during the day, with extreme ease, and no finger bleeding, whether or not you are in a fat burning stage (what some of us call ketosis). I've been using this very, very cool little device for months now and after comparing its results with my blood measurements and I have to say, I am impressed.

Author, Biohacker and Health Expert

Before LEVL, I didn't know the best approach to weight loss for me. Now, I can easily test daily to see how everything I do effects my personal fat burn. Thank you LEVL!

**JOY H.**

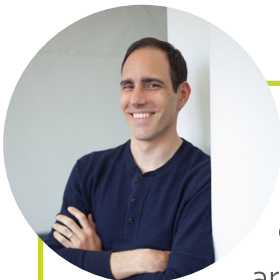

The best thing about LEVL for me is getting that daily moment of YAY! that the scale has never given me.

**APRIL M.**

Technology is advancing so quickly these days that if you fail to innovate, then you'll be left in the dust by those who do. LEVL has proven to be on the cutting edge of breath ketone testing providing not only the cool factor, but also the accuracy and reliability that is a must in health testing devices. LEVL is by far the easiest, most accurate, and technologically advanced breath ketone analyzer I've ever seen!
