

# Why Choose Accuniq by Selvas Healthcare?

## LEADER IN THIS TECHNOLOGY

Selvas Healthcare is the leader in Artificial Intelligence technology. While their presence in the healthcare market is new, they are well established leaders across multiple industries.

Selvas Healthcare has the newest unit on the market today.

In a comparison between Selvas Healthcare's BC-380 and a DEXA (the gold standard for body composition technology) the BC380 tested within .1% of the DEXA for body fat percentage.

## INDUSTRY EXPERIENCE

Selvas understands the importance of industry expertise. They work with dealers like Spartan Wellness Technology who have a deep knowledge of body composition and the industry as a whole. Like you, we've worked in the industry with consumers ourselves.

## PRICING

Selvas Healthcare's Accuniq line's all inclusive pricing model sets the standard for included technology and pricing.

## THE STUFF WE ARE NOT SUPPOSED TO TALK ABOUT (but you deserve to know)

While the leading supplier of body composition sells a lot of units, much of their sales staff has no industry experience. For many this is their first job out of college. They are taught to sell, not to help provide solutions.

Did you know, when working with the industry leader, they have been successfully sued for misleading customers like you regarding the nature of their technology?

---

*Let us help you decide if a BIA unit is right for you. If it is, we will help you every step of the way.*
