

AFTERCARE TO EYELINERS PERMANENT MAKEUP

AFTERCARE INSTRUCTION (WITHIN THE FIRST 2 WEEKS)

In the next 2 weeks after your first procedure get done, client is require to follow the bellow aftercare instruction strictly:

SWELLING:

Moderate pain occurs. An ice bag should be applied for the first few hours. Ten (10) minutes on and ten (10) minutes off. Following the procedure, you may find the area slightly puffy for the first few mornings. Either thinly sliced cucumbers or an ice bad placed on the eyed on the second day for a few minutes in the morning along with sleeping somewhat propped up on your back will make a difference if you know that you have a tendency to swell.

Use only Artificial Tears product to moisten and cleanse eye area.

AVOID:

- Contact lenses the day of the procedure
- Driving (for 8 hours following procedure)
- Chlorine pools for one (1) week
- Soaps, facial cleansers on pigmented area for 2-3 days
- Eye makeup for 5 days until flaking is finished (included non-allergenic)
- Jacuzzi, sauna for 2-3 days
- Retin A on pigmented area for 1 week
- Hot, long, steamy showers
- Eyelash curlers for 2-3 days
- Terry towels on pigmented area for 2-3 days
- Mascara for 5 days then begin with NEW mascara

DO NOT USE oily makeup remover, baby oil, mineral oil or heavy creams, especially glycolics around the eyes. Shower with your back to the water to avoid water, shampoo and conditioner from getting into the pigmented area.

IF EYES BECOME INFECTED, call your physician and obtain prescription for eye drops.

- Do not rub eyes doing so may cause damage. Do not be alarmed by fading after first application. The final color cannot be judged until 3 weeks after touch up applications are completed.
- Clean contacts can be worn 72 hrs after the procedure. You cannot use Saline to wet the eyes. Only Sterile Water...check that the wash is NOT SALINE..it will fade the liner out instantly.
- Only use the Aftercare Lotion provided to you after the procedure for 10 days, or as needed, you cannot over use them. **DO NOT USE TOO MUCH AFTERCARE LOTION ON THE LINER AS IT CAN IRRITATE YOUR EYES, IN THIS CASE, MORE IS NOT BETTER.**
- Eyeliner can and will have some residual pigment that may peel or flake off after a couple days(in most cases)..that is ok..eyeliner tends to fade more so than brows due to the moisture in the eye area. After the touch up the color stays better and lasts longer....Eyeliner will take 2-3 procedures!

Please read and understand the risks to this procedure and strictly follow the aftercare instruction after the treatment.

If you do not follow the aftercare, you may ruin the results and the technician and Luxury Beauty Studio has the right to release you from any future services.

Do not be alarmed by fading after the first application. The final color cannot be judged until at least 3 weeks after the touchup applications are completed. This is the reason follow-ups are required.

Regular makeup can be worn immediately after your procedure, just not on the treated area until healed. Absolutely NOTHING on the eyeliners. No makeup, lotions, pencil....etc. for 10 days....

It is very common to have areas fade more so than others..this is part of the healing process and will be treated at the recommended touch up appointment. Previously done eyebrows may take 1-3 treatments to achieve the desired result. Scar tissue in the brow area of eyebrows done multiple times WILL require additional procedures and fees will apply.

THANK YOU VERY MUCH FOR CHOOSING OUR SERVICE AND WILL SEE YOU AGAIN SOON AT YOUR TOUCH UP APPOINTMENT.
