SEPA[1] Environmental Checklist

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A.Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**

   Fisherman Bay WWTF constructed wetland media replacement, liner replacement, and driveway/access road improvement

2. **Name of applicant:**

   Fisherman Bay Sewer District

3. **Address and phone number of applicant and contact person:**

   Fisherman Bay Sewer District
   Old Fish Bay Lumber Building
   295 Village Road, #201
   P. O. Box 86
   Lopez Island, WA 98261

4. **Date checklist prepared:**

   8/24/26

5. **Agency requesting checklist:**

   Fisherman Bay Sewer District

6. **Proposed timing of schedule (including phasing, if applicable):**

   Construction of the driveway upgrades are scheduled to begin in November 2026 weather permitting. Wetland liner and media upgrades will begin in 2027

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   No

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   The District has completed an Inadvertent Discovery Plan and Cultural Resources Review form and submitted them to Ecology.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

   Fisherman Bay has applied for a permit for the driveway upgrade from the San Juan County

10. **List any government approvals or permits that will be needed for your proposal, if known.**

    A land use change and right of way permit for the driveway upgrade is required by San Juan County

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

Fisherman Bay Sewer District intends to reconstruct the constructed wetlands originally added as a unit process to its system in 2007. To do this the existing basin must be emptied, relined and refilled with new round river rock media and planted with cattail. The base project will not entail any new excavation, but to do the work a truck access and stockpile area for the rock must be created on the North half of the parcel. The District intends to do this first in order to prepare for the main project activities. Doing so will entail some grading in order to flatten the proposed access route, prepare the stockpile area and create storm water BMP's

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

Project location is at the Fisherman Bay Sewer District Wastewater Treatment Facility located on the east side of Lopez Road approximately .28 miles north of the intersection of Lopez Road and Weeks Road. Work is contained to the property within the bounds of the current Wastewater Treatment Facility. TPN 251514004. The West half of the Southeast Quarter of the Northeast Quarter of Section 15, Township 35N, Range 2 West, N.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. General description of the site:

The site is an un-wooded 8 acre site currently hosting a wastewater treatment pond system which occupies about 40 percent of the 8 acres. The remainder of the land is occupied by earthwork berms; some built to serve as a visual barrier others left over from prior construction. The flat areas are occupied by horses.

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

b. What is the steepest slope on the site (approximate percent slope)?

+ or – 3 percent

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Coveland loam 0-5%, Mitchellbay gravelly sandy loam 5-15%, Mitchellbay gravelly sandy loam 0-5%, Roche-Killebrew Complex 2-10 %

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

Grading must occur in connection with the constructed wetland restoration to create an access route for rock delivery trucks and to flatten out an area for rock material stockpiles to be used for the project. The total land area graded will be about 48755 SF (5,417 SY). There are several berms left from the original 2007 construction of the constructed wetland occupying the proposed access route. These berms need to be flattened out. The total volume of dirt is about 500 CY. It is intended that this dirt be used to level the proposed stockpile area and to construct storm water BMP's.

f. Could erosion occur because of clearing, construction, or use? If so, generally describe.

No

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

Project will not add any impervious surfaces

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any.
The project will be within a previously constructed area, access road will use existing vegetation to prevent runoff and erosion.

2. Air

Find help answering air questions[4]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known. Truck traffic and heavy equipment exhaust may contribute diesel emissions in the area during construction and delivery of materials.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe. No

c. Proposed measures to reduce or control emissions or other impacts to air, if any: None

3. Water

Find help answering water questions[5]

a. Surface:

Find help answering surface water questions[6]

1. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Wetlands on the property and the WWTF drain to Puget Sound

2. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

Yes, the constructed wetland is located adjacent to the wetlands located on the property, however, the construction will occur within the confines of the constructed wetland for the treatment plant.

3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air
[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

   No

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

   No, per FEMA FIRM map panel

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.** No, all material will be routed through the WWTF.

b. Ground:

Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   None

c. Water Runoff (including stormwater):

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   Wastewater will be collected and routed back to the WWTF for treatment prior to discharge. Work will be accomplished in the dry season to avoid stormwater contamination. If there is a chance of stormwater runoff, BMPs will be used to avoid soil runoff into the wetlands.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No

d. **Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:** Work will only occur within the bounds of the existing WWTF. There should be no impacts to any drainage patterns.

4. Plants

Find help answering plants questions

a. **Check the types of vegetation found on the site:**

   ☒ **deciduous tree: alder, maple, aspen, other**

   ☒ **evergreen tree: fir, cedar, pine, other**

   ☒ **shrubs**

   ☒ **grass**

   ☒ **pasture**

   ☐ **crop or grain**

   ☐ **orchards, vineyards, or other permanent crops.**

   ☒ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

   ☒ **water plants: water lily, eelgrass, milfoil, other**

   ☐ **other types of vegetation**

b. **What kind and amount of vegetation will be removed or altered?**

   Grass may be disturbed for the access road. Plants in the WWTF will be removed during media replacement and replaced with new plants as part of treatment.

c. **List threatened and endangered species known to be on or near the site.**

   none

d. **Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.**

   None

e. **List all noxious weeds and invasive species known to be on or near the site.** None

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

   Examples include:

   - **Birds: hawk, heron, eagle, songbirds, other:**
   - **Mammals: deer, bear, elk, beaver, other:**
   - **Fish: bass, salmon, trout, herring, shellfish, other:**

   Hawks, Herons, Eagles, Songbirds, Ducks, Seagulls, Deer

b. **List any threatened and endangered species known to be on or near the site.**

   None

c. **Is the site part of a migration route? If so, explain.**

   The area is part of the Pacific Flyway bird migration route

d. **Proposed measures to preserve or enhance wildlife, if any.**

   None

e. **List any invasive animal species known to be on or near the site.** None Known

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

   The districts facilities are powered by electricity with backup power provided by propane or diesel generators.

   During construction equipment will utilize diesel and gasoline as fuel.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

   No

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.** Sewer

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals
[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou

Facilities are constructed in accordance with energy efficiency standards. Energy upgrades are not a part of this project.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.

No

1. **Describe any known or possible contamination at the site from present or past uses.**

   None known.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

   None known

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

   Fuel may be stored on site especially during construction.

4. **Describe special emergency services that might be required.**

   None are expected to be required, however emergency services are available for the site

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   Health and safety risks associated with construction will be discussed during pre-construction meetings with contractors and personnel associated with the project. In the event of a fuel or oil spill from construction equipment or vehicles, spill response materials will be available and notification requirements followed. If contaminated soils are identified all applicable local, state, and federal requirements for management and disposal will be implemented.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   None

[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   Construction equipment noise will occur during the daylight hours on weekdays during construction. Long term noises from the operation of the WWTF are not expected to increase. Emergency backup generators may contribute noise during power outages and routine maintenance.

3. **Proposed measures to reduce or control noise impacts, if any:**

   Equipment used will be equipped with mufflers and will meet noise requirements established by local and state regulations. Noise will be limited to normal working hours.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   The current site is the wastewater treatment facility. It is surrounded by pasture and residential properties. No surrounding land will be affected by the plant upgrade.

b. **Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?**

   No

   1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?** No

c. **Describe any structures on the site.**

   The WWTF consists of an operations building and 4 treatment lagoons

d. **Will any structures be demolished? If so, what?**

   No

e. **What is the current zoning classification of the site?**

   Lopez Village Residential (LVR) per LUCAAR

f. **What is the current comprehensive plan designation of the site?**

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

Lopez Village Urban Growth Area (UGA) per LUCAAR

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No, not according to the Polaris critical area layer

i. Approximately how many people would reside or work in the completed project?

2, the number or workers in the WWTF is not expected to change

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any.

No impact

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.

Project is to enhance the current WWTF to perform treatment at a higher level.

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any: No impacts

9. Housing

Find help answering housing questions[12]

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

No housing is provided with this project

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

No housing is eliminated with this project

c. Proposed measures to reduce or control housing impacts, if any:

None needed

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

   No structure will be added, wastewater wetland treatment will remain the current height

b. **What views in the immediate vicinity would be altered or obstructed?**

   None

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

   None needed

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

   Lighting will remain consistent with the current use.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?** No

c. **What existing off-site sources of light or glare may affect your proposal?**

   None

d. **Proposed measures to reduce or control light and glare impacts, if any:**

   None needed

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?**

Biking, walking

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No

[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None needed

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The construction of the WWTF went through cultural and archaeological review prior to construction. If cultural resources are discovered, work will stop immediately and the tribes will be contacted for further guidance.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

An Inadvertent Discovery Plan (IDP) has been developed and will be implemented during construction. If important archaeological material is uncovered, the plan details the appropriate contacts to call and work will cease .

14. Transportation

Find help with answering transportation questions[16]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Lopez Road

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p
[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No

c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No

d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No

e. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

This project is not expected to increase traffic in any way

f. Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No

g. Proposed measures to reduce or control transportation impacts, if any:

None

15. Public services

Find help answering public service questions[17]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No

b. Proposed measures to reduce or control direct impacts on public services, if any.

None

16. Utilities

Find help answering utilities questions[18]

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services
[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

No utility changes are planned

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Type name of signee: Meike Meissner

Position and agency/organization: District Manager / Fisherman Bay Sewer District

Date submitted: **October 28, 2026**

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

   - **Proposed measures to avoid or reduce such increases are:**

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

   - **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature
[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

3. **How would the proposal be likely to deplete energy or natural resources?**

   - **Proposed measures to protect or conserve energy and natural resources are:**

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

   - **Proposed measures to protect such resources or to avoid or reduce impacts are:**

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

   - **Proposed measures to avoid or reduce shoreline and land use impacts are:**

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

   - **Proposed measures to reduce or respond to such demand(s) are:**

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**
