VENAIR

VENAIR IS AN INTERNATIONAL GROUP LEADER IN ENGINEERING AND MANUFACTURING SILICONE HOSES FOR THE MOST DEMANDING INDUSTRIES SUCH AS PHARMACEUTICAL, BIOTECHNOLOGICAL, FOOD, CHEMICAL AND COSMETIC.

Throughout its 35 years of history, Venair has created an extensive international network that has led to three manufacturing centers in Spain, Vietnam and Romania and 32 delegations distributed in Europe, America and Asia. Thanks to Venair's internationalization strategy, accompanied by a commitment to deliver high-quality products and a constant focus on the customer's needs, today we market our wide range of products worldwide.

Whatever the nature of the fluid you convey, its temperature, concentration, working pressure or even the type of cleaning cycles used in your process, Venair emerges as the specialist in the transfer of liquid, pasty products or even solids offering a wide range of flexible solutions and customized pieces in silicone and other materials.

We hold the management certificates ISO 9001, ISO 14001, EMAS and also the product 3A 62-02 & 18-03 standards, apart from the full product validations required by the top pharmaceutical and biotech industries.

INNOVATION AS A HALLMARK

Innovation is part of Venair Group's DNA, whose leading position is a direct result of great efforts in R&D projects. Over the past years, the company has implemented a new strategic innovation policy aimed at boosting its line of value-added products for the most demanding industries and improving the company's competitiveness.

Venair TechLab, which integrates all R&D projects in the Venair Group, is the face of the commitment to innovation and development.

The main customers in the Food&Pharm industry include multinationals such as Johnson&Johnson, Pfizer, Sanofi, Colgate, Novartis, Bayer, GlaxoSmithKline, Müller, Eli Lilly, Merck, Premier Foods, Guinness, Danone, Nestlé, L'Oreal, Henkel and Coca-Cola.

ALL VENAIR'S FOOD&PHARMA SILICONE RANGE OF PRODUCTS IS MADE WITH A FULLY VALIDATED SILICONE

> FROM THE SIMPLEST FOOD APPLICATION TO THE MOST TECHNICAL BIOPROCESS, VENAIR PROVIDES ITS PRODUCTS WITH THE SAME AND COMPLETELY VALIDATED SILICONE, AVOIDING ANY CROSS CONTAMINATION.

> VENAIR DOES NOT USE PEROXIDE CURED SILICONE IN THE SAME PLANTS WHERE FOOD&PHARMA PRODUCTS ARE MANUFACTURED.

> UNDER REQUEST, WE CAN DELIVER AN EXTENSIVE LEACHABLES AND EXTRACTABLES STUDY.

> ADVANTAGES:

- Animal derived component free (ADCF).
- Platinum cured and post cured to reduce extractables levels.
- Gamma stable and autoclavable.
- Low water absorption and low gas permeability rating.
- Minimal extractables help maintain fluid integrity
- Documented biocompatibility for sensitive applications.

THEREFORE, ALL OUR SILICONE PRODUCTS COMPLY WITH THE FOLLOWING REGULATIONS:

VALIDATION PACKAGE

REFERENCE	TITLE
(EU) No 10/2011	Plastic materials and articles intended to come into contact with food
(EU) No 1935/2004	Simulant B (3% Acetic acid aqueous solution) and Simulant D1 (50% ethanol)
FDA 21 CFR 177.2600	Rubber articles intended for repeated use, FDA ITEM 177.2600 (e)
BfR recommendation XV	Recommendations on the health assessment of plastics and other high polymers
United States Pharmacopoeia <88>	Biological reactivity tests, IN VIVO Class VI - 121°C
ISO 10993-4	Biological evaluation of medical devices—Part 4: Selection of tests for interactions with blood
ISO 10993-5 & USP <87>	Biological evaluation of medical devices – Part 5: Tests for in vitro cytotoxicity
ISO 10993-6	Biological Evaluation of medical Devices – Part 6: Tests for Local Effects After Implantation
ISO 10993-10	Biological Evaluation of medical Devices – Part 10: Tests for Irritation and Skin Sensitization
3A 18-03	Sanitary Standard Procedure N° 18-03 Class I
European Pharmacopoeia 3.1.9.	Silicone elastomer for closures and tubing
Extractables and Leachables study available for 50ShA and 60 ShA silicone	Extraction experiment in organic solvent
	Extraction experiment in polar organic-aqueous solvent system
	Extraction experiment in aqueous solvent, alkaline conditions
	Extraction experiment in aqueous solvent, acidic conditions

VENA® SIL 630

Transparent wire-reinforced silicone hose

> MATERIAL:

Platinum cured silicone in accordance with the main food and pharm certifications.

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- 3A Sanitary Standard 62-02 (fitted hoses).
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> FABRIC REINFORCEMENT: No

> STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> INNER APPEARANCE:

Transparent and completely smooth.

> MAXIMUM LENGTH OF

MANUFACTURE:

The standard length of manufacture is 4m (13'). Upon request, 6m length hoses (19' 8") can be manufactured for some diameters.

TEMPERATURE SCALE:

-55°C / +200°C
(-67°F / +392°F)

VACUUM PRESSURE:

0,80 bar (11,6 psi)

TECHNICAL TABLE
ON PAGE: 36

APPLICATIONS: suitable for the transport by suction or discharge of liquid, semi-liquid, or solid products in the food, cosmetic, pharm and biotech industries. High flexibility and tight bedding radius suitable for filling machines. Its high translucens allows a perfect view of the conveyed product.

VENA® SIL 640

Polyester fabric reinforced silicone hose

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- 3A Sanitary Standard 62-02 (fitted hoses).
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> FABRIC REINFORCEMENT:

Polyester fabric reinforcement.

> STAINLESS STEEL INSIDE: No

> INNER APPEARANCE:

Translucent and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

The standard length of manufacture is 4m (13'). Upon request, 6m length hoses (19' 8") can be manufactured for some diameters.

TEMPERATURE SCALE:

-55°C / +180°C
(-67°F / +356°F)

TECHNICAL TABLE
ON PAGE: 36

APPLICATIONS: is suitable for the transport by impulsion of liquid, semi-liquid or solid products in the food, cosmetic, pharm and biotech industries. It is recommended for dosing and filling machines in straight sections, where flexibility is not required

VENA[®] SIL 650V

Fabric and wire reinforced silicone hose

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

TEMPERATURE SCALE:

-55°C / +180°C
(-67°F / +356°F)

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- 3A Sanitary Standard 62-02 (fitted hoses).
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS3)

> MAXIMUM LENGTH OF MANUFACTURE:

The standard length of manufacture is 4m (13'). Upon request, 6m length hoses (19' 8") can be manufactured for some diameters.

VACUUM PRESSURE:

0,91 bar (13,23 psi)

TECHNICAL TABLE ON PAGE: 37

> FABRIC REINFORCEMENT:

Polyester fabric reinforcements.

> STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> INNER APPEARANCE:

Translucent and smooth.

OUTER APPEARANCE:

Translucent, white or colored, and smooth.

APPLICATIONS: is the most popular hose of this range since it offers a perfect balance between its construction and flexibility and its pressure resistance. It is suitable for the transport by suction or impulsion of liquid, semi-liquid or solid products in the food, cosmetic, pharm and biotech industries.

Its high flexibility and tight bending radius make it suitable for repetitive movements in dosing and filling machines. It is specifically designed to absorb vibrations and to compensate level differences.

VENA® SIL 650V LASTIC

Fabric and wire reinforced silicone hose

> MATERIAL:

Special silicone, formulated by Venair®, with excellent elastic properties manufactured with three polyester fabric reinforcements and a stainless steel wire spring.

> CERTIFICATIONS OF THE INNER LAYER:

- US FDA Standard 21 CFR 177.2600
- USP Class VI <88> in vivo tests
- ResAp 2004 (5), according to Reg 1935/2004/EEC, and Reg 10/2011/EEC
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> FABRIC REINFORCEMENT: Yes

> STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> OUTER APPEARANCE:

Translucent and smooth.

> INNER APPEARANCE:

Translucent and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

6 meters (19.69ft).

TEMPERATURE SCALE:

-55°C / +180°C
(-67°F / +356°F)

Peaks up to 200°C (392°F)

TECHNICAL TABLE
ON PAGE: 38

APPLICATIONS:

VENA® SIL 650/V LASTIC

is recommended especially when a smaller bending radius is required; even smaller bending radius can be achieved compared with the standard 650/V. These hoses are able to transport liquid or semi-liquid foodstuffs at high temperatures by impulsion or suction, since their design can resist pressure or vacuum.

VENA® SIL 650V PLASTIC

Fabric and plastic wire reinforced silicone hose

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications and manufactured with plastic wired, everything encased inside the hose.

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

> STAINLESS STEEL INSIDE:

Plastic wire.

> FABRIC REINFORCEMENT: Yes

> OUTER APPEARANCE:

White and smooth.

> INNER APPEARANCE:

Translucent and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

6 meters (19.69ft).

TEMPERATURE SCALE:

-55°C / +180°C
(-67°F / +356°F)

Peaks up to 200°C (392°F)

TECHNICAL TABLE
ON PAGE: 38

APPLICATIONS:

Recommended when metal spring wire must be avoided. These hoses are able to transport liquid or semi-liquid foodstuffs at high temperatures by impulsion or suction, since their design can resist pressure or vacuum. It is especially recommended for applications where metal detection is required. It also avoids oxidation risk.

VENA[®]SIL 655

Fabric and double wire spring reinforced silicone hose

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- 3A Sanitary Standard 62-02 (fitted hoses).
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

> FABRIC REINFORCEMENT:

Polyester fabric reinforcement.

> STAINLESS STEEL INSIDE:

Double stainless steel wire spring encased inside the hose wall at different levels.

> INNER APPEARANCE:

Translucent and smooth.

VACUUM PRESSURE:
0,91 bar (13,23 psi)

> MAXIMUM LENGTH OF MANUFACTURE:

The standard length of manufacture is 4m (13'). Upon request, 6m length hoses (19' 8'') can be manufactured for some diameters.

OUTER APPEARANCE:

Translucent, white or colored, and smooth.

APPLICATIONS:

It is the most pressure resistant hose of the VENA[®] SIL range since it has a double wire reinforcement. Designed for use at specific situations where there may be sudden high pressure surges (hammering).

TECHNICAL TABLE ON PAGE: 37

TEMPERATURE SCALE:
-55°C / +180°C
(-67°F / +356°F)

VENA[®]SIL FDA-X

Conductive silicone hose

All our standard hoses from the Vena Sil range can be modified in order to reduce the Electrical Resistivity.

- Electrical Surface Resistance is $<10^3$ Ohm according to the specification indicated in part 26.13 of EN 60079-0:2006.
- The hose must be properly grounded, to permit the correct dissipation of the static charge (grounding the hose metal fittings or directly the copper wire of both ends of the hose). Will be customer's responsibility to properly ground the hose.
- Vena Sil FDA-X is suitable for its use in ATEX certified zones*.

CERTIFICATIONS:

US FDA STANDARD 21 CFR 177.2600

OUTER APPEARANCE:

Black and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

The standard length of manufacture is 4m (13'). Upon request, 6m length hoses (19' 8'') can be manufactured for some diameters.

*This product can be mounted in ATEX installations (Explosive Atmospheres) which must, in any case, be certified retrospectively by the relevant competent authority.

VENABIO® FLOW MULTIPURPOSE

Translucent silicone tubing

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

> FABRIC REINFORCEMENT: No

> **HARDNESS:** Available in 60 ShA .(other hardness on demand)

> STAINLESS STEEL INSIDE: No

> INNER APPEARANCE:

Translucent and smooth.

> STANDARD LENGTH OF MANUFACTURE:

50ft (15,24m) and 100ft (30,48m). Other lengths on demand.

> FEATURES:

Manufactured and double bagged in clean room ISO 7 according ISO 14644-1.

TEMPERATURE SCALE:

-55°C / +200°C
(-67°F / +392°F)

TECHNICAL TABLE ON PAGE: 40

OUTER APPEARANCE:

Translucent and smooth. Laser marking.

APPLICATIONS:

It is recommended for the transfer of fluids at very low pressure in filling processes of liquids and semi-liquids. It compensates vibration and level differences. Typical applications are media and buffer preparation, downstream processing, formulation, filling, drug delivery and peristaltic pumps.

It is resistant to UV, radiation and ozone. It is gamma stable and autoclavable. Its ultra-smooth bore helps to control bacterial growth. It has low water absorption and it is certified Animal derived component free. Also, is used in media and buffer preparation and distribution in biopharmaceuticals manufacturing processes. Not recommended for vacuum pressures. Its Platinum curation and post curation reduces extractable levels.

VENA® TECHNOSIL

Polyester braided
silicone tubing

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

OUTER APPEARANCE:

Translucent, white or colored, and smooth.

CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- 3A Sanitary Standard 62-02 (fitted hoses).
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

> FABRIC REINFORCEMENT:

Polyester braiding.

> STAINLESS STEEL

INSIDE: No

> INNER APPEARANCE:

Translucent and smooth.

> STANDARD LENGTH OF MANUFACTURE:

10m and 20m (33ft and 66ft)

> ALTERNATIVE:

VENA BIO BRAIDED .

Manufactured and double bagged in clean room ISO 7 according ISO 14644-1.

APPLICATIONS:

Vena® Technosil is suitable for the transport by impulsion of liquid, semi-liquid or solid products in the food, cosmetic, pharm and bio-tech industries. It is recommended for repetitive movements in dosing and filling machines where no tight bending radius is needed. It is used in applications which require long lengths. It is recommended for downstream processes in the pharma and biopharma industries. It is resistant to UV, radiation and ozone. It is gamma stable and autoclavable. Its ultra-smooth bore helps to control bacterial growth. Its Platinum curation and post-curation reduces extractable levels. It has low water absorption and it is certified Animal derived component free.

**TECHNICAL TABLE
ON PAGE: 39**

TEMPERATURE SCALE:

-55°C/+180°C
(-67°F/+356°F)

VENA® TECHNOSIL DB

Double polyester braided
silicone tubing

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

TEMPERATURE SCALE:

-55°C/+180°C
(-67°F/+356°F)

CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- 3A Sanitary Standard 62-02 (fitted hoses).
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

> FABRIC REINFORCEMENT:

Double polyester braiding.

> STAINLESS STEEL INSIDE: No

> INNER APPEARANCE:
Translucent and smooth.

> STANDARD LENGTH OF MANUFACTURE:

10m (33ft) and 20m (66ft).

TECHNICAL TABLE

ON PAGE: 39

OUTER APPEARANCE:

White and smooth.

APPLICATIONS:

Due to its special construction, this product is specially recommended for applications where a high pressure resistance and a small bending radius are required. It is not recommended for vacuum.

It is resistant to UV, radiation and ozone. It is gamma stable and autoclavable. Its ultra-smooth bore helps to control bacterial growth. It has low water absorption and it is certified Animal derived component free. Its Platinum curation and post-curation reduces extractable levels.

VENAFLO[®] HF

PFA silicone hose

VENAFLO: THE BEST SOLUTIONS TO CONVEY AGGRESSIVE PRODUCTS

> MATERIAL:

Platinum cured silicone hose with an inner liner of PFA fluoropolymer which is in accordance with the main food and pharm certifications.

APPLICATIONS:

The inner layer of PFA makes the hose very resistant to liquids and semi liquids and aggressive chemical products. The construction of this hose allows the conveying of products at high temperatures by suction or discharge, as the new design makes it resistant to pressure and vacuum.

> CERTIFICATIONS OF THE INNER LAYER:

- US FDA Standard 21 CFR 177.1550
- USP Class VI <88> in vivo tests
- USP Class VI <87> in vitro tests
- ISO 10993-5, 10 y 11
- Reg 1935/2004/EEC, and Reg 10/2011/EEC
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3.)

> FABRIC REINFORCEMENT:

Yes

> STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> INNER APPEARANCE:

White and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

20m (65,62ft) with INOX 316L connections (and others under demand).

> **ALTERNATIVE:** VENAFLO with inner liner of PTFE material.

OUTER APPEARANCE:

Translucent and smooth.

VACUUM RESISTANCE:
0,9 bar (13,05 psi)

TEMPERATURE SCALE:
-30°C/+150°C
(-22°F/+302°F)

TECHNICAL TABLE ON PAGE: 46

VENAFLO[®] HF-X

Conductive PFA silicone hose

VENAFLO: THE BEST SOLUTIONS TO CONVEY AGGRESSIVE PRODUCTS

> MATERIAL:

Platinum cured silicone hose with inner liner of conductive black-colored layer of PFA fluoropolymer in accordance with the main food and pharm certifications.

> CERTIFICATIONS OF THE INNER LAYER:

- US FDA Standard 21 CFR 177.1550
- USP Class VI <88> in vivo tests
- USP Class VI <87> in vitro tests
- ISO 10993-5, 10 y 11
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

> ELECTRICAL PROPERTIES:

- Venaflon[®] HF-X is suitable for its use in ATEX certified zones*.

> FABRIC REINFORCEMENT: Yes

> STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> INNER APPEARANCE:

Black and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

20m (65,62ft) with INOX 316L connections (and others under demand).

> RESISTIVITY:

The inner PFA layer of this hose presents a low resistivity ($R < 10^6 \Omega$).

TEMPERATURE SCALE:

-30°C/+150°C
(-22°F/+302°F)

VACUUM RESISTANCE:

0,9 bar (13,05 psi)

TECHNICAL TABLE
ON PAGE: 46

APPLICATIONS:

This hose presents a wide field of application due to its construction which gives it a balance between strength and lightness. The inner layer for this hose is made of antistatic PFA (Perfluoroalkoxy) which has a high compatibility with highly aggressive chemicals. This hose is able to transport liquid or semi-liquid food-stuffs by impulsion or suction, since its design can resist either pressure or vacuum. This product is specifically recommended to food and pharma applications where it is required a high conductivity to avoid electrostatic charge of the hose.

OUTER APPEARANCE:

Translucent and smooth.

*This product can be mounted in ATEX installations (Explosive Atmospheres) which must, in any case, be certified retrospectively by the relevant competent authority.

VENAFLO[®] HR

Highly resistant PFA hose

VENAFLO: THE BEST SOLUTIONS TO CONVEY AGGRESSIVE PRODUCTS

> MATERIAL:

EPDM blue color rubber with inner liner of PFA fluoropolymer in accordance with the main food and pharm certifications.

OUTER APPEARANCE:

Blue color and smooth.

> CERTIFICATIONS OF THE INNER LAYER:

- US FDA Standard 21 CFR 177.1550
- USP Class VI <88> in vivo tests
- USP Class VI <87> in vitro tests
- ISO 10993-5, 10 y 11
- Reg 1935/2004/EEC, and Reg 10/2011/EEC
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS3).

> FABRIC REINFORCEMENT: Yes

> STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> INNER APPEARANCE:

White and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

20m (65,62ft) with INOX 316L connections (and others under demand).

APPLICATIONS:

VENAFLO HR is an excellent solution to withstand dynamic stress during the transfer of high purity fluids. It is suitable for use in filling machines and it is externally resistant to the abrasion. The inner layer is made of PFA (Perfluoroalkoxy) which has a high compatibility with highly aggressive chemicals.

This hose is able to transport liquid or semi-liquid food-stuffs by impulsion or suction, since its design can resist either pressure or vacuum. The perfluorinated inner liner ensures utmost chemical and temperature resistance, an excellent impermeability and absolutely hygienic and contamination-free delivery of fluid.

TEMPERATURE SCALE:

-40°C/+150°C
(-40°F/+302°F)

TECHNICAL TABLE ON PAGE: 45

VENAFLO[®] FULL-X

Conductive PFA hose

VENAFLO[®]: THE BEST SOLUTIONS TO CONVEY AGGRESSIVE PRODUCTS

> MATERIAL:

Synthetic black rubber hose with inner liner of black-colored layer of PFA fluoropolymer in accordance with the main food and pharm certifications.

> CERTIFICATIONS OF THE INNER LAYER:

- US FDA Standard 21 CFR 177.1550
- USP Class VI <88> in vivo tests
- USP Class VI <87> in vitro tests
- ISO 10993-5, 10 y 11
- Reg 1935/2004/EEC, and Reg 10/2011/EEC
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

> ELECTRICAL PROPERTIES:

- ISO 8031:2009 / EN12115 (if is complete with end fittings)
The hose presents a resistivity lower than $10^9 \Omega$.

• Venaflon[®] FULL-X is suitable for its use in ATEX certified zones*

> FABRIC REINFORCEMENT: Yes

> STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> INNER APPEARANCE:

Black and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

20m (65,62ft) with INOX 316L connections (and others under demand).

APPLICATIONS:

VENAFLO[®] FULL-X is a highly flexible universal hose and its main characteristic is that it is conductive and, therefore, suitable for working areas requiring utmost safety. It is specially recommended for the transport of liquid or semi-liquid fluids, specially, when the chemical products are highly flammable.

This hose is able to transport liquid or semi-liquid food-stuffs by impulsion or suction, since its design can resist either pressure or vacuum. The perfluorinated inner liner ensures utmost chemical and temperature resistance, an excellent impermeability and absolutely hygienic and contamination-free delivery of fluid. The hose is resistant to abrasion, weather, oils and fats.

OUTER APPEARANCE:
Black and smooth.

TEMPERATURE SCALE:

-20°C/+65°C
-4°F/+149°F in accordance with EN 12115:2011

VACUUM RESISTANCE:

0,9 bar (13,05 psi)

TECHNICAL TABLE
ON PAGE: 45

*This product can be mounted in ATEX installations (Explosive Atmospheres) which must, in any case, be certified retrospectively by the relevant competent authority.

VENA® FLEXPURE

Highly flexible PTFE hose

VENA®FLEXPURE PRESENTS AN EXCELLENT RESISTANCE TO ACIDS AND CIP CLEANING PROCESSES

> **MATERIAL:** Manufactured with inner PTFE resins, braided with stainless steel, covered with white rubber silicone.

VENA®FLEXPURE

The inner layer of PTFE makes it perfect for conveying aggressive chemicals by impulsion or suction in food, cosmetic and pharmaceutical applications.

> CERTIFICATIONS OF THE INNER LAYER:

- US FDA Standard 21 CFR 177.550
- USP Class VI <88> in vivo test, 120°C
- European Regulation (EU) 10/2011

This hose is in accordance with the RoHS Directive 2002/95/EC and its subsequent amendments including the RoHS Directive 2011/65/EU and RoHS 3 Directive 2015/863.

> PROPERTIES:

- White and smooth outer appearance.
- White smoothbore inner layer special construction to guarantee the maximum flexibility while a high kink resistance.
- It can resist abrasion and hydrocarbon fluids.

> CLEANING PROCESSES:

It can be cleaned with steam, SIP or CIP process - acidic and some basic under demanding conditions.

TEMPERATURE SCALE:

-50°C/+200°C
(-76°F/+500°F)

**TECHNICAL TABLE
ON PAGE: 42**

> MAXIMUM LENGTH OF MANUFACTURE:

4 meters long (13.12ft) to but in specific diameters a length of 6 meters (19.69 ft) can be manufactured.

VENA® FLEXIP

Highly flexible hybrid hose

VENA®FLEXIP IS THE PERFECT SOLUTION TO CONVEY OILY PRODUCTS IN DAIRY AND COSMETIC INDUSTRIES

> **MATERIAL:** The product is made of fluoroelastomers and PTFE particles, which makes it a good resistance to both acidic and some basic CIP cleaning solutions.

> CERTIFICATIONS OF THE INNER LAYER:

- US FDA Standard 21 CFR 177.2600.
- USP Class VI <88> in vivo test, 121°C.
- ResAp 2004 (5), according to Reg 1935/2004/EEC, and Reg10/2011/EEC with simulants A (10% of ethanol) and simulant D2 (olive oil)

> PLATINUM CURED SILICONE PRODUCED IN COMPLIANCE WITH:

- US FDA Standard 21 CFR 177.2600.
- German BfR Standard part XV.
- USP Class VI <88> in vivo test, 121°C.
- ISO 10993-4,5,6&10.
- ResAp 2004(5), according to Reg 1935/2004/EEC, and Reg 10/2011/EEC.
- European Pharmacopeia 3.1.9.
- 3A Sanitary Standard 18-03 Class I (material).

This hose is in accordance with EU Directive 2002/95/EEC for Restriction of the use of hazardous substances (RoHS)

> MAXIMUM LENGTH OF MANUFACTURE:

4 meters long (13.12ft) to but in specific diameters a length of 6 meters (19.69 ft) can be manufactured.

VENA®FLEXIP is specially recommended for the transport of liquid or semi-liquid in the food, cosmetic, chemical and pharmaceutical industries. It has good resistance specially in fatty or oily foods and glycols, as well as alcoholic beverages.

TEMPERATURE SCALE:
-20°C/+175°C
(-4°F/+347°F)

TECHNICAL TABLE ON PAGE: 41

CLEANING COMPATIBILITY:

Media	Concentration	Temperature
Hot water	-	Up to 95°C
Steam	-	Up to 130°C - max 30 min
Caustic Soda	1%	Up to 80°C
	3%	Up to 25°C
Nitric Acid	0,5%	Up to 80°C
	2%	Up to 65°C
Peracetic Acid	3%	Up to 80°C

VENA® FLEXIP

Highly flexible hybrid hose

CHEMICAL COMPATIBILITY: This following chart is purely informative and does not imply any responsibility of Venair. Chemical compatibility will depend on the conditions of the customer, such as the temperature, immersion time, etc. For further information you can contact our specialists.

VITOSIL®

FKM silicone hose

› MATERIAL:

Platinum cured silicone hose with inner liner of white, Class A FKM in accordance with the main food and pharm certifications.

› CERTIFICATIONS OF THE INNER LINER:

- US FDA Standard 21 CFR 177.2600
- Regulation 10/2011/EC and Reg 1935/2004/EC. · Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

› FABRIC REINFORCEMENT: Yes

Alternatives: all the Vena Sil range of products can be manufactured with an inner layer of FKM.

› STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

› INNER APPEARANCE:

White and smooth.

› OUTER APPEARANCE:

White and smooth.

› MAXIMUM LENGTH OF MANUFACTURE:

The standard length of manufacture is 4m (13'). Upon request, 6m length hoses (19' 8") can be manufactured for some diameters.

› APPLICATIONS:

Due to the inner FKM layer it is especially recommended to convey aggressive fluids that are not compatible with silicone. These hoses are able to transport liquid or semi-liquid foodstuffs at high temperatures by impulsion or suction, since their design can resist pressure or vacuum.

TEMPERATURE SCALE:

-30°C/+180°C
(-75°F/+356°F)

ADAPTSIL®

Special silicone shapes

› **MATERIAL:**

Platinum cured silicone produced in accordance with the main food and pharm certifications.

› **CERTIFICATIONS:**

- Complete Validation Package. Check page 4.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3).

› **STAINLESS STEEL INSIDE:** No

› **OUTER APPEARANCE:**

Translucent and smooth.

› **INNER APPEARANCE:**

Translucent and smooth.

APPLICATIONS:

ADAPTSIL® offers 7 different standard geometrical configurations but we can customize any piece according to the customer's needs. ADAPTSIL® is recommended to:

- Compensate system vibrations as well as to optimize the overall life of the hose or tube connections.
- Solve handling system miss-alignments as well as increased ease in hose or tube installation.
- Offer sound dampening characteristics in your process systems due to its elastic and flexible construction.

*This product is also available with an inner layer of FKM.

› **CUSTOM MADE SHAPES:**

Venair offers technical advice and manufacturing of all types of silicone shapes including reducers, elbows and all kind of customer's needs.

TEMPERATURE SCALE:

-55°C/+180°C
(-67°F/+356°F)

**TECHNICAL TABLE
ON PAGE: 46**

SILICONE SLEEVES

Perfect vision of the conveyed product

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

TEMPERATURE SCALE:

-55°C / +180°C
(-67°F / +356°F)

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> STAINLESS STEEL INSIDE: No

> INNER APPEARANCE:

Translucent and completely smooth.

> STANDARD CONSTRUCTIONS:

- Sleeve without textile reinforcement with a wall thickness of 1,3mm (+1/-0,5mm) / 0,05 inches (+0,04/-0,002 inches).
- Sleeve with 1 textile reinforcement with a wall thickness of 2,3mm (+1/-0,5mm) / 0,09 inches (+0,04/-0,002 inches).

> MAXIMUM LENGTH OF MANUFACTURE:

4m (13ft), until 6m (19.69ft) under request

OUTER APPEARANCE:

Translucent and smooth.

APPLICATIONS:

Silicone sleeves are suitable to convey liquids, semi liquids and powders at low pressure (gravity discharge) or protecting against contamination outer-inner or inner-outer in areas of product handling. The high flexibility allows a perfect absorption of vibrations. The translucent aspect allows a visual of the conveyed product.

This product is able to compensate small vibrations and level differences. You can avoid fluid contamination by using a Venair silicone sleeve, e.g. to protect juices from any contact with metallic parts.

PHARMALoader®

Smooth silicone compensator

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> FABRIC REINFORCEMENT:

It is made with polyester reinforcements between the silicone layers. To obtain the correct elastic compensation, it is fitted with stainless steel rings, which also prevent volumetric expansion.

> STAINLESS STEEL INSIDE: No

> INNER APPEARANCE:

Translucent and completely smooth.

> OUTER APPEARANCE:

Translucent, and smooth or corrugated.

> MAXIMUM LENGTH OF

MANUFACTURE: Custom made.

> ALTERNATIVES:

- **Pharmaloder HP:** Special construction for high pressure resistance.
- Available with an inner layer of FKM for transport of chemicals.

APPLICATIONS:

PHARMALoader® is an elastic compensator for the pharmaceutical and food industries. This product is a standard element fitted with molded Tri-Clamp seals at the ends of the compensator. The counter-flange elements are made from INOX 304L steel. It is the ideal solution for all tank, hopper, pump and weighing tank outlets to compensate vibrations and level differences. Autoclavable and sterilizable.

CUSTOM-MADE COMPENSATORS:

Venair offers a wide range of silicone compensators which are corrugated in the inside to better withstand vibrations and level differences.

TEMPERATURE SCALE:

-55°C/+180°C
(-67°F/+356°F)

**TECHNICAL TABLE
ON PAGE: 40**

HEATED HOSE

Electrical heated silicone hose

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS3)

> CONSTRUCTION:*

Silicone hose equipped with an electrical resistance encased inside the wall in order to provide a regular temperature to the hose for an optimum flow of the conveyed product. Inner cable is connected to an electronic regulator and is also equipped with a PT 100 Ohm gauge connected to the regulator through a cooled end.

> ALTERNATIVES:

This hose can be manufactured without heating up to the ends to maintain high flexibility and lightness.

> FABRIC REINFORCEMENT: Yes

> STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> INNER APPEARANCE:

Translucent and completely smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

Custom made, up to 6m (19,69ft) max.

> VOLTAGE:

220 V or 110V depending on specific user needs.

TEMPERATURE SCALE:

- Operational temperature:
 - 55°C (-67°F)
 - +180°C (356°F)
 - Peaks up to +200°C (392°F)

- Set temperature:
 - 0°C (32°F)
 - +200°C (392°F)

APPLICATIONS:

It is specially recommended for applications which needed to ensure a constant temperature to help maintain the flow of the product conducted through it in the food, cosmetic, chemical and pharmaceutical industries. It is suitable for conveying viscous products that needs to maintain a regular temperature during the production process, such as caramel, glycerin or chocolate.

OUTER APPEARANCE:

White and smooth.

*There are three possible constructions, please consult and request the most suitable to your needs.

COOLING HOSE

Spiral tubing rolled along the silicone hose

> MATERIAL:

Platinum cured silicone produced in accordance with the main food and pharm certifications.

OUTER APPEARANCE:

White and convoluted.

APPLICATIONS:

For conveying products that require a stable temperature, this silicone hose is equipped with a cylindrical conduit encased in spiral along the length of the hose. Fittings are assembled on both ends. This system provides a regular temperature of the conveyed product by steam or hot water through the inside of the conduit for heating, and nitrogen or cold water for cooling.

> CERTIFICATIONS:

- Complete Validation Package. Check page 4.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS3)

> FABRIC REINFORCEMENT: Yes

> STAINLESS STEEL INSIDE:

Stainless steel wire spring encased inside the hose wall.

> INNER APPEARANCE:

White and completely smooth.

> MAXIMUM LENGTH OF

MANUFACTURE: Custom made.

TEMPERATURE SCALE:

- Operational temperature:
-55°C (-67°F)
+180°C (356°F)

Peaks up to +200°C (392°F)

VENA® VIEW

Sight flow indicators

> MATERIAL:

Fluoropolymer hose (PFA or FEP) in accordance with the main food and pharm certifications.

TEMPERATURE SCALE:

-55°C / +180°C
(-67°F / +356°F)

> CERTIFICATIONS:

- USFDA Standard 21 CFR 177.1550.
- USP Class VI, <88> in vivo test
- ISO 10993, Part 5.
- ResAp 2004 (5), according to Reg 1935/2004/EEC, and Reg 10/2011/EEC.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> INNER APPEARANCE:

Translucent and completely smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

Under demand (3m/10ft maximum).

> ALTERNATIVES:

This hose can be manufactured with PFA or FEP fluoropolymers or with silicone.

TECHNICAL TABLE

ON PAGE: 45

> STAINLESS STEEL INSIDE: No

OUTER APPEARANCE:

Smooth non-sticky surface.

APPLICATIONS:

Food Grade translucent fluoropolymer with aseptic fittings for applications where visual inspection of the conveyed material is required. It can be mounted in-line and makes it very easy to view product flow in any process or system. FEP/PFA is compatible with many chemical and aggressive products, which makes this product a very resistant and durable option, capable for extended uses.

TELCRA®

Insulating material for
silicone hoses

> MATERIAL:

TELCRA® is an innovative and unique material in the market with excellent insulation characteristics. This material possesses low thermal conductivity and low density, for this reason it can achieve excellent insulation with a low thickness. TELCRA® forms chemical bond with silicone materials. Telcra can be applied in the outer layer of any of Venair products.

> **DENSITY (kg/m³):** 500

> **THICKNESS:** Customizable

> **THERMAL CONDUCTIVITY [W/(m.K)]:** 0.12

> ADVANTAGES

- **ULTRALIGHT:** Lightweight

material with a density of 500 kg/m³.

- **EASY INSTALLATION:** Super flexible material. Contours easily to complex forms.
- **ADHESION TO SILICONE:** Telcra® presents an adhesive-free chemical adhesion with silicone materials.
- **ENVIRONMENTALLY SAFE:** Odorless, tasteless and completely non-toxic.

APPLICATIONS:

TELCRA® has the best thermal insulation and a low thermal conductivity for improved efficiency. When the hose is properly installed in the correct thickness, it eliminates condensation problems on cold surfaces. It is suitable for very cold or frozen liquids and semi liquids in the food, pharmaceutical and biotech industries. It also helps to maintain the product temperature inside the hose.

TEMPERATURE SCALE:

-30°C / +180°C
(-22°F / +356°F)

OUTER APPEARANCE:

White and smooth.

VENA® TECHNIPUR® VAC FDA

> MATERIAL:

Polyurethane in food quality, produced in accordance with the main food and pharm certifications.

High flexible polyurethane hose

APPLICATIONS:

Transparent polyurethane hose recommended for the transport of bulk or powder materials for the food, pharmaceutical and chemical industries. Generally acceptable for pneumatic transport of bulk materials and for vacuum of all types of abrasive particles.

OUTER APPEARANCE:

Translucent and corrugated.

> CERTIFICATIONS:

- US FDA (Foods and Drugs Administration) Standard 21 CFR 177.1680 and CFR 177.2600.
- 1935/2004/EC Regulation and 10/2011/EC (Migration Test).
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> FABRIC REINFORCEMENT: No

> STAINLESS STEEL INSIDE:

PVC coated steel wire encased inside the walls. Upon request it can be manufactured with stainless steel wire spring.

> INNER APPEARANCE:

Translucent and smooth.

> MAXIMUM LENGTH OF MANUFACTURE: 10 m (33 ft).

> ALTERNATIVES:

VENA TECHNIPUR VAC FDA X: It is recommended for chemical industry and when a low electrical surface resistivity is required. This polyurethane material has an electrical surface resistivity, according to IEC/TS 60079-32-1, of $<10^9$ [$\Omega \cdot m$]. It is manufactured with stainless steel wire encased inside the walls.

TEMPERATURE SCALE:

-20°C / +80°C
(-4°F / +176°F)

TECHNICAL TABLE
ON PAGE: 42

VENA® TECHNIPUR® S100/S200

> MATERIAL:

Food quality polyurethane, produced in accordance with the main food and pharm certifications.

Smooth mandrel-made polyurethane hose

> CERTIFICATIONS:

- US FDA (Foods and Drugs Administration) Standard 21 CFR 177.1680 and CFR 177.2600.
- 1935/2004/EC Regulation and European Council Resolution AP 2004 (5) – silicones and 10/2011/EC (Migration Test).
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS3)

> STAINLESS STEEL INSIDE:

Stainless steel wire spring (can be equipped with 316L stainless steel wire and fittings under demand).

> INNER APPEARANCE:

Translucent and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

6 m (20 ft) under request.

TEMPERATURE SCALE:

-20°C / +80°C
(-4°F / +176°F)

TECHNICAL TABLE
ON PAGE: 43

OUTER APPEARANCE:

VENA® TECHNIPUR® S200 is translucent and smooth.

OUTER APPEARANCE:

VENA® TECHNIPUR® S100 is translucent and corrugated.

ALTERNATIVES:

- TECHNIPUR X S100
- TECHNIPUR X S200

They are the conductive versions which have an electrical surface resistivity of $<10^9$ [$\Omega \cdot m$] according to IEC/TS 60079-32-1

APPLICATIONS:

Recommended for pneumatic transport of bulk materials and for vacuum of all types of abrasive particles.

VENA® ABRASIL

Highly resistant to abrasive particles

> MATERIAL:

New formulation developed by Venair. Special hybrid polymer with polyester fabric reinforcement and a metal wire spiral, everything encased inside the hose.

APPLICATIONS

The Vena® Abrasil hose is recommended for suction and transport in food and pharmaceutical industries. Generally acceptable for pneumatic transport of non-flammable bulk materials and suction of all types of abrasive particles.

> CERTIFICATIONS:

- FDA 21 CFR 177.2600. Rubber articles intended for repeated use, FDA ITEM 177.2600(e)
- USP (88) Biological reactivity tests, IN VIVO class V.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS3)

> **FABRIC REINFORCEMENT:** Yes

> **STAINLESS STEEL INSIDE:** Yes

> **OUTER APPEARANCE:** White and smooth

> **INNER APPEARANCE:** White and smooth

> **MAXIMUM LENGTH OF MANUFACTURE:** 4 m (13.12 ft). In specific diameters a length of 6 m (19.69 ft)

> CLEANING PROCESS:

- > Can be cleaned by water up to 90°C (194°F)
- > Can be sterilized by steam at 120°C (248°F)
- > Not recommended for CIP process

> Corrugated version

TEMPERATURE SCALE:

-20°C / +90°C
(-4°F / +194°F) it may reach up to 120°C (248°F) during short period of time

TECHNICAL TABLE ON PAGE: 44

ALTERNATIVES:

- Corrugated version for much higher flexibility
- With Plastic spiral
- Abrasil - X conductive version. The inner layer of the hose presents a resistivity lower than $10^7 \Omega$.

VENA® FOOD

Butyl rubber hose

> MATERIAL:

EPDM rubber hose with inner layer of butylic rubber in accordance with the main food certifications.

> CERTIFICATIONS OF THE INNER LAYER:

- US FDA (Foods and Drugs Administration) Standard 21 CFR 177.2600.
- 1935/2004/EC Regulation and European Council Resolution AP 2004 (5) – silicones and 10/2011/EC (Migration Test).
- German BfR Standard part XXI Cat 2.
- 3A Sanitary Standard 18-03 Class III.
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> FABRIC REINFORCEMENT: Yes

> STEEL INSIDE:

Steel wire spring encased inside the hose wall.

> OUTER APPEARANCE:

Violet and smooth.

> INNER APPEARANCE:

White and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

40 meters (131ft).

TEMPERATURE SCALE:

-20°C / +100°C
(-46°F / +212°F)

Peaks up to 130°C (266°F)
for sterilisation (max. 30min)

**TECHNICAL TABLE
ON PAGE: 40**

APPLICATIONS:

The Vena® Food flexible hose is recommended for all types of food products, even at high temperatures (milk, chocolate, drinking water, fruit juice, fresh cream, oil, cosmetic cream, alcohol, etc.). These hoses have a strong, durable construction that can withstand excessive physical handling.

VENA® OIL&FATS

NBR rubber hose

> MATERIAL:

Manufactured with inner NBR rubber and CR cover, it is equipped with plies of synthetic cord reinforcements inside the wall of the hose, with an embedded steel helix wire.

> CERTIFICATIONS:

- US FDA Standard 21 CFR 177.2600
- Material used is in accordance with EU Directive 2015/863 for Restriction of the use hazardous substances (RoHS 3)

> STAINLESS STEEL INSIDE: Yes

> FABRIC REINFORCEMENT: Yes

> OUTER APPEARANCE:

Green and smooth.

> INNER APPEARANCE:

White and smooth.

> MAXIMUM LENGTH OF MANUFACTURE:

40 meters (131ft).

TEMPERATURE SCALE:

-20°C / +90°C
(-46°F / +194°F)

Peaks up to 130°C (266°F)
for sterilisation (max. 30min)

**TECHNICAL TABLE
ON PAGE: 41**

APPLICATIONS:

Specifically designed to convey milk and liquid fatty foodstuffs.

Normally used in dairies, edible oil mills and food processing industries. The high-strength hose structure makes it ideal for unloading operations of milk and milk products and generally for heavy-duty applications.

MOLDED CLAMPS

VENAIR® molded silicone clamps are well-suited for critical applications in high purity industries. These assemblies are manufactured with the same raw material than this is used to manufacture hoses and tubing. They reduce installation time (no gaskets), improve cleanliness (no retention zone) and maintain the benefits of the silicone.

VENAIR® molded silicone clamps are available in mini and standard Tri-Clamp fitting styles and are supplied with integrated gaskets molded directly to the face of the clamps. Protective backup cups (thermoplastic or stainless steel) provide a stable clamping surface and safeguard the clamps during installation and use.

- Platinum-cured silicone.
- Completely smooth transition from the tubing or the hose through the clamp.
- Constant diameter. No internal reductions.
- Autoclavable and sterilizable CIP and SIP.
 - Meets USP Class VI, FDA and BfR standards*.
 - Easy installation. Reduces assembly time.
 - Temperature resistance: -60°C to 180°C.
 - No product contact with metallic materials.
- Molded clamps can be supplied on any Venair silicone tubing or hose construction.

* Under request, molded assemblies can meet all the certifications set out in the Validation Package.

SZR SYSTEM

(WITHOUT RETENTION ZONE)
AND 3A HOSE ASSEMBLIES

The SZR assembly system ensures a higher level of non-retention in the flexible hoses, as well as greater safety of use. Moreover, our crimped hoses can be Certified according to the 3A Sanitary Standard 62-02 for hose assemblies.

QUALITY OF FINISH

The roughness of the inner surface of the SZR* fittings presents a maximum rugosity of 0.8 microns and can be improved on request. The batch number for the raw material used is indicated on each fitting. All connections are manufactured in a single block, without welds, and the flexed 45° or 90° connections are secured by an orbital weld.

STERILIZATION

ALL FLEXIBLE HOSES MUST BE STERILIZED BEFORE USE AND MUST ONLY BE USED FOR THE INTENDED PURPOSE FOR WHICH THEY WERE DESIGNED.

Our silicone hoses can be sterilized by steam cycles of 30 minutes at a max temperature of 135°C (275°F).

A minimum time of 1 hour must be left between steam cycles for material stabilization. It is recommended an accurate inspection of the hose after 150 hours of sterilization.

It is important to note that steam alters the mechanical and volumetric properties of the silicone elastomer. The product may suffer from the effects of hydrolysis if the sterilization time is exceeded.

Hose replacement criteria based on visual inspection includes among others, displacement of layers, displacement of wire helix from their normal pitch, signs of displacement of fittings or leakage in the ends, reinforcement fabric exposed, wire corrosion, dents, kinks or abrasion marks in both internally and externally.

Other sterilization methods:

- Beta radiation
- Gamma radiation
- Ethylene oxide
- Hydrogen peroxide

TRACEABILITY SOLUTIONS

ALL THE VENAIR CRIMPED HOSES COUNT WITH THE BATCH NUMBER MARKED IN THE FITTINGS.

Venair also offers other traceability solutions in order to improve the data reading. Various solutions make it possible to obtain all information related to the hose during the manufacturing process, e.g. raw materials, product codes and components, lot number, appropriate certificates, production and sale date and related orders. **The QR code can be marked in any FDA silicone hose. Marking silicone hoses with the QR codes does not distort any characteristic of the hose.** It maintains flexibility, pressure resistance and range of temperature.

> QR MARKING

The QR code assures 100% traceability of the hose. A QR code is presented as an alternative to the chip that is commonly used in the market to assure hoses traceability.

- QR code is marked on the silicone with a laser which makes it indelible.
- It does not need any additional software.
- QR code can be read with all kind of mobile device which has downloaded an app to read codes.
- Applications to read QR codes are completely free for any device.
- QR code can provide all kind of information about the product.
- Data content in the code are completely customizable.

> IDENTIFICATION BY COLOR

Labels:

Silicone labels can be placed over any hose in order to mark specific information required by the client. Labels offer clear identification, cleanliness and permanence in the silicone hose.

Venair silicone labels can be customized to meet your specific needs such as part number, manufacturing date, replacement date, or any specific information that you consider to be important.

Features:

- The label is not in contact with the inner liquid.
- It is made of permanent vulcanized silicone.
- Certified free of animal-derived ingredients.
- Handles clean-in-place (CIP) or steam-in-place (SIP) processes.
- Autoclavable.
- More than 15 colors available.

STAINLESS STEEL FITTINGS 316L

Available in 316L stainless steel, with the exception of the nuts and ferrules which are made of 304 stainless steel. Other fittings can be assembled upon request (RJT, FIL, ISS, MACON, GAS JIC, flanges). Clamps and auxiliary parts for welding can also be manufactured.

MORE THAN HOSES

IMPORTANT:

The Company reserves the right to change, amend, modify, suspend, continue or terminate all or any part of this Catalogue at any time without notice.

It is the user's responsibility to ensure the suitability and safety of the VENAIR products for all intended uses. All the tests must be conducted in accordance with applicable regulatory requirements in order to determine the safety and effectiveness for use of the hoses in any particular application.

Limited Warranty: For a period of 6 months from the date of sale, VENAIR warrants this product to be free from defects in materials and workmanship. Our only obligation will be to replace any portion proving defective, or at our option, to refund the purchase price thereof. User assumes all other risk, if any, including the risk of injury, loss or damage, direct or consequential, arising out of the use, misuse, or inability to use, this product. **THIS WARRANTY IS IN LIEU OF THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR PARTICULAR PURPOSE, AND ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED.** No deviation is authorized. VENAIR assumes no obligations or liability for any advice furnished by it, or for results obtained with respect to those products. All such advice is given and accepted at the buyer's risk.
