

SUD/ DIRECTORS

8/23/19

The NARR Standards have been recognized by the Michigan OROSC office.

MARR reviews the following domains:

Administrative
Operations

Physical
Environment

Recovery
Supports

Good
Neighbor

MARR also provides technical assistance for recovery residence operators including MATT inclusion.

TREATMENT TECHNICAL ADVISORY #11

SUBJECT: Recovery Housing

ISSUED: July 31, 2015

EFFECTIVE: October 1, 2015

PURPOSE:

To provide guidance to the field on developing and supporting recovery housing for *Prepaid Inpatient Health Plans (PIHPs)* and interested programs.

Recovery Housing Standards

After careful consideration of the options available, OROSC has come to the determination that the levels of recovery housing and standards identified by *NARR* most closely fit the vision of recovery housing for Michigan.

- Level I - Peer Run
- Level II - Monitored
- Level III - Supervised
- Level IV – Service Provider

Recovery Housing Standards Cont.

The Following are samples of the standards identified by NARR; they are representative of the interests and activities that OROSC supports. Recovery residence must:

- Identify clearly the responsible person(s) in charge of the recovery residence to all residents.
- Collect and report and accurate process and outcome data for continuous quality improvement.
- Maintain an accounting system that fully documents all the resident's financial transactions
- Use an applicant screening process that helps maintain a safe and supportive environment for a specific group of persons in recovery
- Foster mutually supportive and recovery-oriented relationships between residents and staff through peer-based interactions, house meetings, community gatherings, recreational events and other social activities
- Encourage each resident to develop and participate in his/her own personalized recovery plan
- Provide non-clinical recovery support and related services
- Encourage Residents to attend mutually supportive self-help groups and/or outside professional services
- Maintain the interior and exterior of the property in a functional, safe and clean manor that is compatible with the neighborhood
- Provide rules regarding noise, smoking, loitering and parking that are responsive to a neighbor's complaints.

- Recovery residences are protected under the Federal Fair Housing laws from states requiring mandatory licensure
- Recovery residences who obtain CAIT Prevention Licenses are not inspected by LARA
- LARA mails prevention only CAIT licenses for \$500

LARA Licensing (NOT)

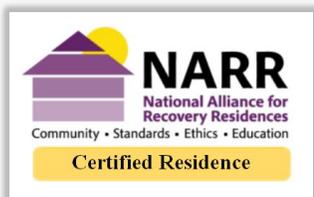

Site Reviews

- Site reviews occur after all documentation has been received and inspected
- Site reviews fall under Section 2 of NARR Standards 'Physical Environment Domain'
- Site reviews occur once a year or at random
- Cost is \$300 per home first year and \$150 per home each additional year
- MARR is SOR Grant funded

Top 4 Reasons to Become Certified

- National recognition and best possible care for your clients
- Added to our referral list of accredited operators and reserve the rights to the MARR/NARR Certified Residence Logos
- Government Funding Opportunities
- Higher sobriety percentages and better scientifically proven outcomes based on the social model

The Social Model:

Emphasizing the process of learning through “doing” and “experiencing” and providing positive role models.

MARR ACCREDITED OPERATORS

Various PIHP's and CMH's have required MARR certification for eligibility to receive state funding for resident's first 60 days in a recovery residence.

To view our full list of operators, click on the Accredited Operators tab of our website.
