ONLY ONE PRESIDENT AT A TIME

By Stan Purdy

The US Constitution provides the Country has one President at a time. Donald J. Trump, however, exerted his influence over Republican members of Congress to kill a nonpartisan bill that would have provided money and changes to the border and immigration laws. He did this so, he could use the border issue against President Biden in the 2024 campaign. Nothing demonstrates Trump's self-interest as does this interference

For months Senate Republicans were holding up approval of aid to Ukraine and Israel to get significant improvements to funding for more Border Patrol Agents and changes in the immigration laws. This was in response to the overwhelming number of immigrants crossing the border legally and illegally. Leaders of both parties in the Senate approved an effort to develop a nonpartisan bill.

The Senate bill was negotiated by a nonpartisan committee. It was hailed by Senators and commentators alike as the best improvement to immigration in decades. President Biden supported the Bill. In steps Trump and puts the kibosh on the bill by telling congressional Republicans to kill the bill which they did.

Trump wants to get credit for any improvements if he is elected, meanwhile, thousands of immigrants stream across the border from now until 2025. Aid to Ukraine and Israel was also part of the bill and was not approved. Donald J. Trump did not put the County first.
