How VIP Works

Real-time Visual Intelligence

- Track multiple stores, departments and functions
- Visual Merchandising
- Store Remodeling
- Real Estate
- Plant Maintenance
- Franchise Compliance

Centralized

- Teams have access to centralized, real-time field information in a secure cloud-based platform

Customized

- Multiple user roles for controlled data access
- Data management by store, market or region
- Branded reporting for coop & brand partners

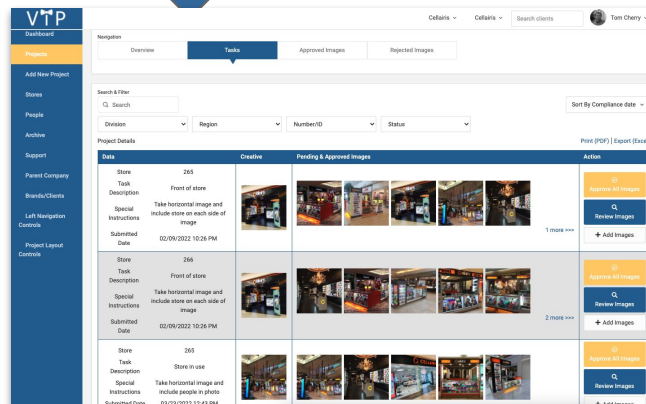

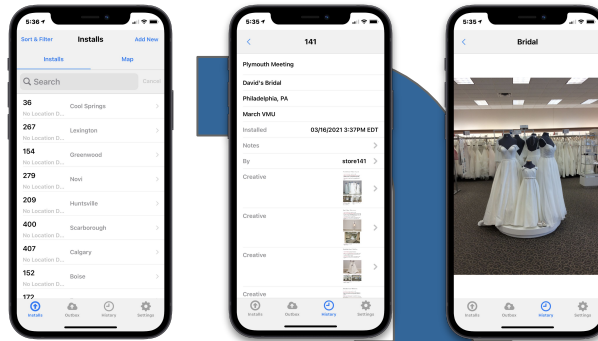

Easy to set up, easy to use

- Simple mobile app for field employees
- Intuitive web interface and dashboard for corporate users
- Independent platform

Download the Visual Intelligence Platform app

Cost Efficient

- \$20 per store, per month
- Saves approximately 10% of an employee's time

International

- Available in multiple languages and operational in the USA, South America, Canada & Europe

Secure

- Role based and password protected
- Cloud-based platform with redundancy backup
- Compatible with private intranet systems

Compliance Analytics

- By store, market, region, user and more

All in a single dashboard

- Every project available in one interface
- Data is archived once complete and can be retrieved on demand

Visual Compliance Management

Managing visual compliance across hundreds or thousands of locations can be complex. Legacy verification methods have relied on physical visits which can be time consuming and inefficient.

In the modern brick and mortar retail environment, where customer experience and efficiency are more important than ever, retailers must be able to identify and address store issues in real time, eliminating delays in discovering or correcting problems.

Project Title	Start Date	Location	Total Images	Approved Images	Rejected Images	Pending Images	Progress
Opening Prom Prep-10	01/26/2023	5	0	0	0	0	0%
January 2023 VMU - Sign 101	01/19/2023	295	2680	3480	400	410	95%
December 2022 VMU	12/12/2022	295	2033	1194	424	415	94%
November 2022 VMU	11/14/2022	295	2420	1379	429	408	94%
Alterations Google Verification	11/02/2022	252	379	55	36	288	99%
October 2022 VMU	10/10/2022	295	2658	1486	491	481	95%
Little Tuxedo Photo Submission	09/27/2022	15	113	14	70	25	84%
September 2022 VMU	09/06/2022	295	2901	1458	544	899	90%

VIP simplifies, centralizes and streamlines the monitoring of visual compliance and store presentation for all stakeholders.

With VIP's mobile app & project management dashboard, store users just need to take a photo and VIP does the rest.

About POP Tracker

POP Tracker is a centralized, cloud-based software platform that enables brands to track, verify, and manage marketing and visual merchandising.

The platform maps creative images against each location and then works with field personnel to gather real-time photos of marketing execution and general compliance.

POP Tracker manages thousands of Out of Home media campaigns each year, tracking and analyzing compliance for the largest national advertisers and brands.

- Never crowdsourced: controlled completely by company employees, without third party auditors

"Integrating POP Tracker into our visual merchandising strategy has been a real game-changer," said Bob Walker, Chief Retail Officer at David's Bridal. "It is incredibly important for us to deliver an exceptional in-store experience from the moment she walks through our doors, this includes all visual elements. With VIP, we can leverage technology aligned with our digital transformation to truly serve her."
