# DAVIS FIRE & SECURITY

**SimplySecur** is a cloud-based access control system. The system can be managed from anywhere via any Internet connected PC or smart device.

True to the original: The weatherproof, robust successor to our successful MOBOTIX dual camera features interchangeable sensor modules as well as the latest **MOBOTIX system technology**. As a result, it remains totally unique in terms of performance, functionality and design.

## Access Control

There's a reason why infinias access control solutions have been trusted for years. Whether leveraging cloud or server-based options, 3xLOGIC provides cost-effective security solutions that are easy to manage, simple to install, and scale with your changing needs.

## US-inBio-4 Pro Door Kit

InBio Pro Series is a project oriented high-end product line with unique features such as embedded fingerprint verification and advanced access control functions, which can be managed by TCP/IP communication thru LAN or WAN networks.
