

Product Overview

Verkada for K-12 Education

Modern Video Surveillance & Security

Highly Scalable | 24/7 Remote Access | Instant SMS Alerts

All-in-one system
— no NVRs/DVRs/servers
required

Software so easy it works
for everyone — no training
required

Live Link — instantly share
a camera's live feed during
emergency response

THE ALL-IN-ONE SYSTEM FOR K-12 EDUCATION

Organizations of all sizes use Verkada to simplify and strengthen their physical security operations. Our unique system design eliminates outdated equipment, such as NVRs and DVRs, resulting in technology so easy to use that everyone benefits — from IT managers and administrators to teams responsible for facilities, physical security, asset protection, and emergency response.

Each Verkada camera encrypts and stores video in solid-state storage

(30, 60, 90 and 120-day models available)

Cameras communicate securely with Verkada's high-uptime cloud service

Securely view and manage video 24/7 on any device, anywhere in the world.

ORGANIZATIONS OF ALL SIZES TRUST VERKADA

CUSTOMER STORY: MORGAN HILL UNIFIED SCHOOL DISTRICT

“With Verkada, we’re bringing our security systems out of that archaic age of DVRs.”

- Jim Carrillo, Director of Technology at Morgan Hill Unified

Situated south of San Jose in the Bay Area of California, Morgan Hill Unified School District serves 8,900 students across its 15 schools. As the needs of its principals and administrators evolve, MHUSD’s head of technology, Jim Carrillo chose Verkada to replace aging server-based CCTV technology.

CENTRALIZED MANAGEMENT

- From a single Verkada account, Jim and his team are able to easily manage cameras and user permissions for administrators across the district

24/7 REMOTE ACCESS

- Authorized users are able to access video on their mobile device, without the need for special configuration, plug-ins or thick clients

STRAIGHTFORWARD COST ALLOCATION

- Cost is allocated at the individual camera level, making budgeting for each school clear-cut and easy

NO TRAINING NEEDED

- Software so simple that no additional training is required for IT, facilities, or administrators to access and use the system

'ZERO CONFIGURATION' SETUP

- No NVRs/DVRs, no VPN config, no port-forwarding
- All cameras are PoE and, by default, communicate over HTTPS via port 443
- Cameras auto-provision into your account once plugged into a PoE switch with DHCP

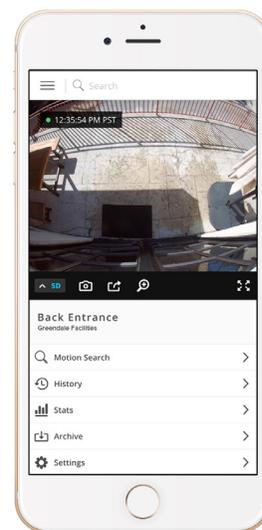

ACTIVITY SEARCH

- Isolate areas of interest and instantly surface footage where activity was detected — e.g., pinpoint exactly when an object went missing
- Quickly export, archive and share video clips in standard formats (e.g., mp4)
- Save time, speed incident response

REAL-TIME RESPONSE

- Instantly share live video streams with first responders, administrators and others via SMS text and weblinks
- On-camera accelerometer sends SMS alerts when tampering is detected
- View and manage video on any device
- Embed live video streams to share sports games and other school activities with the broader community

ALWAYS UP TO DATE, ALWAYS SECURE

- Software and firmware automatically kept up to date via regular updates, feature releases and enhancements
- No more manual system updates and upatched vulnerabilities
- Redundant firmware banks ensure failsafe updates and high uptime
- Latest data encryption and security standards, with no special configuration required

EASY MANAGEMENT

- Easily control user permissions at the District, School, Site and Camera levels
- SAML and two-factor authentication available for added account protection
- No thick clients, third-party plugins or additional hardware required

CUTTING-EDGE TECHNOLOGY DESIGN

- An ultra-high quality 3-megapixel CMOS sensor yields 50% more detail than 1080p
- High Dynamic Range and proprietary algorithms ensure optimal picture quality
- Slim bandwidth footprint of 20 kbps/camera during normal operating mode
