

Solar For Her

Empowering Girls with Solar Powered Classrooms!

<https://solarforher.com/>

How we select a Girls' School to be Solar Powered

Our primary focus is to empower girls in Pakistan access solar powered classrooms and fight climate change! We particularly look at potential girls' schools which suffer from power crisis in extremely tough weather condition.

Which girls' schools can be selected in this campaign?

- Any school of primary or middle level, public or private
- Schools with majority girls students
- School location can be any part of the country, preferably poor areas
- School solely run for individual business purpose is not preferred

Selection Criteria

Factor	Points
A) At least 50 % girls enrollment in school	15
B) Technical feasibility	40
C) No or poor electricity supply at school	25
D) Direct benefit to poor girls	20
Minimum points for school selection	
A + B	40
C + D	30
