We have thousands of dies suited to a majority of natural gas compressors and can also cut gaskets to your specifications. Our team is CAD certified and uses the software necessary to customize your unique pattern. We have the ability to find and make what you need, with over 40,000 OEM cross-referenced part numbers. Uncut sheets of materials are also available for special requests. For a quote request, size inquiries, current prices, delivery options and to request a free set of material samples, contact us at:
