

Dear DA Jeff Lindsey,

We are writing to formally present a citizen petition signed by over 200 residents of Cañon City and Fremont County regarding serious concerns about Personal Recognizance bond usage in our community.

This petition represents a broad cross-section of our community—families, business owners, professionals, and concerned citizens—who believe current PR bond practices are undermining public safety and community confidence in our justice system.

We respectfully request:

- A thorough review of current PR bond policies and implementation
- Consideration of reforms that better balance individual rights with public safety
- Open dialogue with community stakeholders
- Your leadership in addressing these concerns at the appropriate level

This issue affects the fundamental trust between citizens and our institutions. Our law enforcement officers deserve to see their efforts supported by a justice system that takes criminal behavior seriously.

We would welcome the opportunity to discuss these concerns further and are committed to working collaboratively toward meaningful solutions.

Thank you for your attention to this critical community issue. We look forward to your response.

Respectfully submitted on behalf of the undersigned citizens,

Citizens Concerned about Crime

Cañon City and Fremont County, Colorado
