

PROJECT INSPIRATION ADA PLAN

Project Inspiration

“We build to inspire so they’re Inspired to build”

www.projectinspir8tion.rog

At Project Inspiration our current staff has copies of the Americans with Disabilities Act title three (Public Accommodations and Commercial Facilities) PDF and have received it in their handbook and have acknowledged the fact that they understand that they have to abide by it. We also plan on holding annual sensitivity training for staff and volunteers. We do provide reduced ticketing charges for disabled audience members and non-disabled assistance companions to our events as well accommodations for individuals participating in our programs.

We also plan on using some of our new cutting edge technological innovations for marketing and promotions such as direct to mobile advertising by way of hyper local advertising and Geo fencing to do specific target marketing to our entire demographic as well as specific portions of that demographic. We do plan on advertising with the Cumberland County department of aging and disabled and have press releases and advertising mention accessibility and provide contact information for further information.

All flyers and emotional documentation will have the standard accessibility logos upon them. Along with the onboard architect and general contractors who are on board as part of the rehab team of our new facility we have designed it to make the building fully accessible no matter what area of the building you're in (classrooms, hallways, restrooms, etc.). We have planned for compliant parking, wheelchair accessible routes to all public spaces, accessible bathrooms, wheelchair seating, as well as being able to offer listening devices to augment sound for people who are hearing impaired

Alterations

Project Inspiration is going to be rehabbing and altering our facility, the elements and spaces being altered will comply with the ADA Standards. The ADA Standards set minimum accessibility requirements for alterations and our architect JW Pederson has outlined the elements in the rendering he has drawn up.

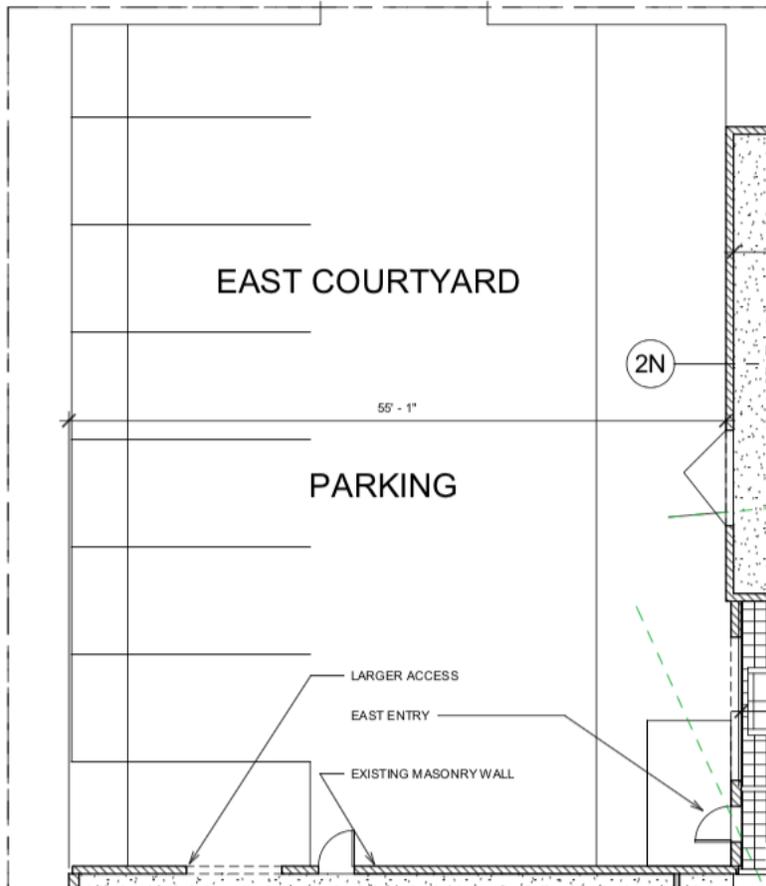

Parking

The chart below indicates the number of accessible spaces required by the ADA Standards. One out of every six accessible spaces must be van-accessible. Project Inspirations parking lot will only fit enough parking spaces to allow one (1) van/hadicaped accessible parking spot to be located closest to the door..

Project Inspiration

“We build to inspire so they're Inspired to build”

www.projectinspir8tion.rog

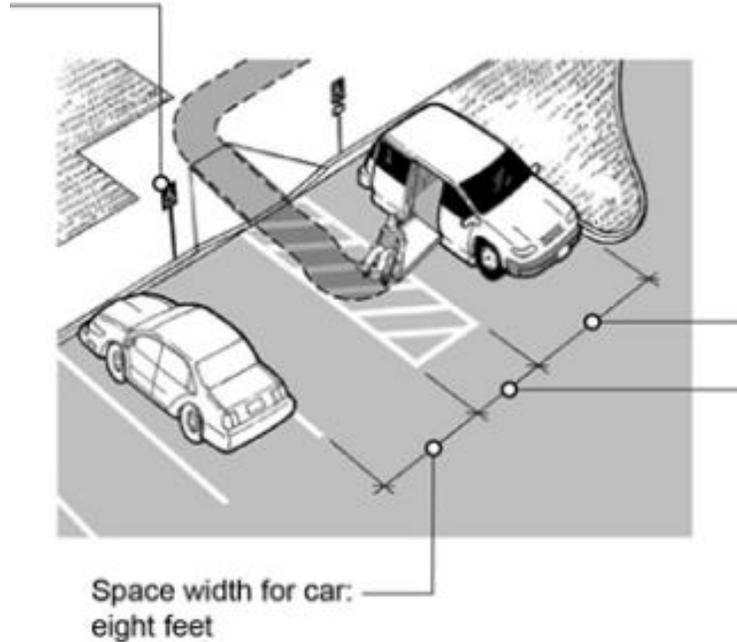

Our limited parking will have van-accessible parking spaces with signage. Our accessible parking space will have an access aisle, which allows a person using a wheelchair or other mobility device to get in and out of the car or van. The accessible parking space (including access aisles) will be level (maximum slope 1:48 in all directions) and each access aisle will adjoin an accessible route.

Accessible Entrances

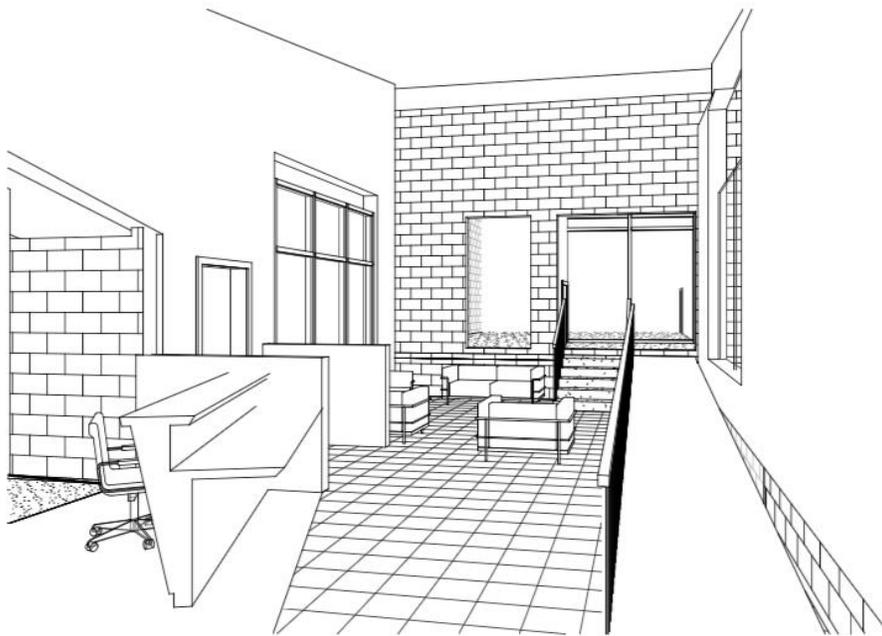

So that one small step at an entrance will not make it impossible for individuals using wheelchairs, walkers, canes, or other mobility devices to enter our facility we're removing this barrier in a number of ways, such as installing ramps and walkways to provide an accessible route. The main entrance is made to be accessible with flat surfaces and wide doorways and no matter where you are in the building anyone in need looking for an alternate accessible entrance can find one. Signs will be posted at the inaccessible entrances directing individuals to the accessible entrance. This entrance will be open whenever other public entrances are open.

③ LOBBY VIEW

Accessible Routes to Programs and Services

A person with a disability will have accessible routes that will be at least three feet wide, and remain accessible and not be blocked by items such as vending or ice machines, newspaper dispensers, furniture, filing cabinets, display racks, or potted plants. Similarly, accessible toilet stalls and accessible service counters will not be cluttered with materials or supplies. The accessible route will be the same, or be located in the same area as, the general route used by people without mobility disabilities.

Shelves and Service Counters

The obligation to provide program access will also apply to merchandise shelves, sales and service counters, and check-out aisles. Shelves used by the public will be on an accessible route with enough space to allow individuals using mobility devices to access merchandise or materials. However, shelves may be of any height since they are not subject to the ADA's reach range requirements. A portion of sales and service counters will be accessible to people who use mobility devices.

Staff Training

Project Inspiration

“We build to inspire so they’re Inspired to build”

www.projectinspir8tion.org

A critical, but often overlooked, component of ensuring success is comprehensive and ongoing Project Inspiration is dedicated to ensuring that our front line staff and volunteers are not aware of ADA policies or do not know how to implement them, problems can arise. It is important that our staff -- especially front line staff who routinely interact with the public -- understand the requirements on modifying policies and practices, communicating with and assisting customers, accepting calls placed through the relay system, and identifying alternate ways to provide access to programs and services when necessary to accommodate individuals with a mobility disability. We will conduct ADA training within our community .
