

THE EPS FORUM

MARCH, 25>27 - 2024
HENRY FORD BUILDING,
FREIE UNIVERSITÄT, BERLIN

EPS-FORUM

- Predavanja dobitnika Nobelove nagrade
 - Tutorijali
 - Workshops
 - Simpozijumi
- Poster sekcija mladih istrazivaca

EPS-Minds

- Leadership sastanak
- Poster sekcija
- Networking

Enrichment:

- Razgledanje Berlina
- Posjeta muzejima

Pripremila: Prof. dr Gordana Lastovicka-Medin

THE EPS FORUM

MARCH, 25>27 - 2024
HENRY FORD BUILDING,
FREIE UNIVERSITÄT, BERLIN

- EPS Young Minds -

"THE EPS FORUM is a unique opportunity for exchanges between young researchers, world-renowned physicists and industrial leaders"

PLENARY SPEAKERS:

Anne L'Huillier

Klaus von Klitzing

Stefan Hell

Nicola Spaldin

CONFERENCES & ROUND TABLES

Physics Meets Industry | Scientific Colloquium | Societal Challenges

Klaus von Klitzing

Laureate of the 1985 Nobel Prize
in Physics

Anne L'Huillier

Laureate of the 2023 Nobel Prize
in Physics

Stefan Hell

Laureate of the 2014 Nobel Prize
in Chemistry

Nicola Spaldin

Member of the ERC Scientific
Council. Laureate of the 2017
L'Oréal-UNESCO Award for
Women in Science

Learn new areas to grow in

THE FORMAT OF THE EPS FORUM WILL INCLUDE A SERIES OF CONFERENCES, ROUND TABLES AND WORKSHOPS ON:

- Atomic molecular and optical physics for quantum technologies
- Applications of nuclear and particle physics to Society
- Condensed matter and applications to industry
- Physical models for energy management, pollution and climate; neuromorphic computing
- Photonics

EPS Young Minds Montenegro section journey

Projects done by Young Minds Montenegro team:
Prof. Dr Gordana Lastovicka - Medin, Nevena Zivkovic, Vanja Backovic, Jovan Jokic, Jovan Djurkovic, Michaela Lastovicka, Sara Vrancar, Ivona Asanin & Dejan Karadzic

EPS Young Mind Montenegro section was established during the EPS-TIG event in Petrovac in 2023.

Shortly thereafter, we launched our website at <https://epsymontenegro.com/>

CERN

Empowered by the overwhelming response, we pursued a platform to share our innovations on an international stage. Our journey led us to CERN, where, during the esteemed 43rd RD50 Conference, we proudly presented the rennovations of the RD50 group through our interactive project.

- + Arduino IDE

PREPARATION

Initial recognition and passion for art and science supported by the Young Minds Project.

These elements were brought to life through the application of Conductive Paint, Bare Conductive Microcontrollers, and Arduino boards.

WORKSHOP

Not only did we exhibit our achievements, but we also assumed the role of educators by conducting workshops.

These sessions served as platforms for young minds to dive into the exciting world of cutting-edge technologies.

Innere Organe

Dieses Exponat zeigt die Organe des Kreislaufs und der Atmung, welche im Menschen funktionieren. Sie liegen direkt in dem Körperhohlraum.

Das Brust- und Bauchgefäß und vom Atem- und Beutelgefäß sind hier dargestellt. Die Organe sind aus einer hochdurchlässigen Identoplastik hergestellt und können leicht gewaschen werden. Sie sind nicht wiederverwendbar.

Die Nahrung wird im Magen-Darmkanal durch myonastische wellenförmige Muskelkontraktionen verarbeitet. Dieser Vorgang nennt sich Peristole.

Der Verdauungsprozess wird nicht vollständig ausgetragen. Se wird automatisch durch die Rohrgefäße abgeführt, welche auch nur den Durchgang von Nahrung ermöglichen.

Activia

... für die Kurzzeit- und Langzeitplanung, für die Vorbereitung auf die Zukunft, für die Sicherung der Existenz und Lebensqualität. Ein Leben nach den Prinzipien der Lebensplanung ist ein Leben mit mehr Sicherheit, mehr Freiheit und mehr Freude.

surprisingly, achieving a balance between competing priorities can be difficult. No matter our circumstances, balance is an important factor in feeling satisfied in our lives.

© Begriff des Todes

On the left side of the page, the first two columns of text are rotated 45 degrees clockwise, and the last two columns are rotated 45 degrees counter-clockwise.

Living Death

The following are the principal findings:
1. The majority of the patients had been receiving their treatment for less than 1 year.
2. There was no significant difference between the mean age of the patients who had been receiving their treatment for less than 1 year and those who had been receiving it for more than 1 year.
3. The mean age of the patients who had been receiving their treatment for less than 1 year was significantly higher than the mean age of the patients who had been receiving it for more than 1 year.
4. The mean age of the patients who had been receiving their treatment for less than 1 year was significantly lower than the mean age of the patients who had been receiving it for more than 1 year.
5. The mean age of the patients who had been receiving their treatment for less than 1 year was significantly higher than the mean age of the patients who had been receiving it for more than 1 year.
6. The mean age of the patients who had been receiving their treatment for less than 1 year was significantly lower than the mean age of the patients who had been receiving it for more than 1 year.
7. The mean age of the patients who had been receiving their treatment for less than 1 year was significantly higher than the mean age of the patients who had been receiving it for more than 1 year.
8. The mean age of the patients who had been receiving their treatment for less than 1 year was significantly lower than the mean age of the patients who had been receiving it for more than 1 year.
9. The mean age of the patients who had been receiving their treatment for less than 1 year was significantly higher than the mean age of the patients who had been receiving it for more than 1 year.
10. The mean age of the patients who had been receiving their treatment for less than 1 year was significantly lower than the mean age of the patients who had been receiving it for more than 1 year.
