CAUTION DIFFERENTIAL LOCK SYSTEM OPERATION

- Use only to free your stuck vehicle in an emergency escape from the muddy road.
- Operate DIFF LOCK at speeds below 5 mph (8 km/h).
- Do not operate DIFF LOCK switch while wheels are spinning to prevent unexpected movement.
- On paved roads, use of differential lock requires large steering effort and careful cornering control. When FRONT DIFF LOCK is engaged, steering control will become difficult.
- When your vehicle is freed, be sure to disconnect all differential locks.

See Owner's Manual for more instructions.
