JUVÉDERM VOLUMA® XC injectable gel is for deep injection in the cheek area to correct age-related volume loss in adults over 21.

JUVÉDERM® XC injectable gel is for injection into the facial tissue for the correction of moderate to severe facial wrinkles and folds, such as nasolabial folds.

JUVÉDERM® Ultra XC is for injection into the lips and perioral area for lip augmentation in adults over 21.

JUVÉDERM® Ultra XC for areas other than the lips and perioral area for lip augmentation, or facial wrinkles and folds, have not been established in clinical studies.

Tell your doctor if you are using medications that can prolong bleeding, such as aspirin, ibuprofen, or other blood thinners, as this may result in increased bruising or bleeding at the injection site.

Tell your doctor if you have a history of excessive scarring (eg, hypertrophic scarring and keloid formations) or pigmentation disorders, as use of these products may result in additional scars or changes in pigmentation. With JUVÉDERM® XC and JUVÉDERM® Ultra XC injectable gels, most side effects are mild or moderate and last 14 days or less. For JUVÉDERM VOLUMA® XC, side effects are moderate (uncomfortable) and last 2 to 4 weeks.

To report a side effect with JUVÉDERM VOLUMA® XC, JUVÉDERM® XC, or JUVÉDERM® Ultra XC, please call Allergan Product Surveillance at 1-800-624-4261.

For more information, please see Juvederm.com or call Allergan Medical Information at 1-800-433-8871.

Available by prescription only.
After

What precautions should my doctor advise me about?

Do not use these products if you have a history of multiple severe allergies or severe allergic reactions.
•  Patients who experience skin injury near the site of injection with these products may be at a higher risk of side effects.
•  Tell your doctor if you are planning other laser treatments or a chemical peel, as there is a possible risk of complications.
•  Tell your doctor if you have a history of excessive scarring (eg, hypertrophic scarring and keloid formations) or pigmentation disorders, as use of these products may result in additional scars or changes in pigmentation.
•  Minimize strenuous exercise, exposure to extensive sun or heat, and alcoholic beverages within the first 24 hours following treatment.

What are possible side effects?

Side effects are mild or moderate and last 14 days or less. For JUVÉDERM VOLUMA® XC, side effects are moderate (uncomfortable) and last 2 to 4 weeks.

Complications can be serious and may be permanent. These complications, which have been reported for facial injections, can include vision abnormalities, blindness, stroke, temporary scabs, or permanent scarring.

As with all skin injection procedures, there is a risk of infection.

To report a side effect with JUVÉDERM VOLUMA® XC, JUVÉDERM® Ultra XC, or JUVÉDERM® Ultra XC, please call Allergan Product Surveillance at 1-800-624-4261.

For more information, please see Juvederm.com or call Allergan Medical Information at 1-800-433-8871.

Available by prescription only.

JUVÉDERM VOLUMA® XC injectable gel is for deep injection in the cheek area to correct age-related volume loss in adults over 21.

JUVÉDERM® Ultra XC is for injection into the lips and perioral area for lip augmentation in adults over 21.

IMPORTANT SAFETY INFORMATION

Are there any reasons why I should not receive any JUVÉDERM® injectable gel formulation?

Do not use these products if you have a history of multiple severe allergies or severe allergic reactions (anaphylaxis), or if you are allergic to lidocaine or the gram-positive bacterial proteins used in these products.

What precautions should my doctor advise me about?

•  Tell your doctor if you are pregnant or breastfeeding. The safety of these products for use during pregnancy or while breastfeeding has not been studied.
•  The safety of JUVÉDERM® XC and JUVÉDERM® Ultra XC injectable gels in patients under 18 years, and the safety of JUVÉDERM VOLUMA® XC in patients under 35 years or over 65 years has not been studied.
•  The safety and effectiveness of JUVÉDERM® XC for areas other than facial wrinkles and folds, and JUVÉDERM® Ultra XC for areas other than the lips and perioral area for lip augmentation, or facial wrinkles and folds, have not been established in clinical studies.
•  The safety and effectiveness of JUVÉDERM VOLUMA® XC in areas other than the cheek area have not been established in clinical studies.
•  Tell your doctor if you have a history of excessive scarring (eg, hypertrophic scarring and keloid formations) or pigmentation disorders, as use of these products may result in additional scars or changes in pigmentation.
•  Tell your doctor if you are planning other laser treatments or a chemical peel, as there is a possible risk of inflammation at the treatment site if these procedures are performed after treatment.
•  Patients who experience skin injury near the site of injection with these products may be at a higher risk of side effects.

For correction of moderate to severe facial wrinkles and folds, such as:

- Parentheses lines
- Vertical lip lines
- Corner lines
- Marionette lines

Before and After photos. Before treatment with JUVÉDERM VOLUMA® XC. A total of one.syringe.syringe of JUVÉDERM VOLUMA® XC was injected into the cheek area. A total of one.syringe.syringe of JUVÉDERM VOLUMA® XC was injected into the cheek area for a total of two.syringe.syringe mL. Unretouched photos taken before treatment and one.month.month after second treatment with JUVÉDERM VOLUMA® XC. An additional one.syringe.syringe/mL was injected into the cheek area.

For a subtle lift in your cheek area.

JUVÉDERM® XC Important Information

- Tell your doctor if you are using medications that can prolong bleeding, such as aspirin, ibuprofen, or other blood thinners, as this may result in increased bruising or bleeding at the injection site.
- Minimize strenuous exercise, exposure to extensive sun or heat, and alcoholic beverages within the first 24 hours following treatment.

**For age-related volume loss in the cheek area.**
The safety of JUVÉDERM

Tell your doctor if you are pregnant or breastfeeding. The safety of these products for use during pregnancy or 

Do not use these products if you have a history of multiple severe allergies or severe allergic reactions (anaphylaxis), or if you are allergic to lidocaine or the gram-positive bacterial proteins used in these products.

Important Safety Information

Are there any reasons why I should not receive any JUVÉDERM® injectable gel formulation?

Do not use these products if you have a history of multiple severe allergies or severe allergic reactions (anaphylaxis), or if you are allergic to lidocaine or the gram-positive bacterial proteins used in these products.

What precautions should my doctor advise me about?

• Tell your doctor if you are pregnant or breastfeeding. The safety of these products for use during pregnancy or while breastfeeding has not been studied.
• The safety of JUVÉDERM® XC injectable gels in patients under 18 years, and the safety of JUVÉDERM VOLUMA® XC in patients under 35 years or over 65 years has not been established.
• The safety and effectiveness of JUVÉDERM® XC for areas other than facial wrinkles and folds have not been established in clinical studies.
• The safety and effectiveness of JUVÉDERM VOLUMA® XC in areas other than the cheek area have not been established in clinical studies.
• Tell your doctor if you have a history of excessive scarring (eg, hypertrophic scarring and keloid formations) or pigmentation disorders, as use of these products may result in additional scars or changes in pigmentation.
• Tell your doctor if you are planning other laser treatments or a chemical peel, as there is a possible risk of inflammation at the treatment site if these procedures are performed after treatment.
• Patients who experience skin injury near the site of injection with these products may be at a higher risk for side effects.
• Tell your doctor if you are on immunosuppressive therapy used to decrease the body’s immune response, as use of these products may result in an increased risk of infection.

What are possible side effects?

The most common side effects include tenderness, swelling, firmness, lumps/bumps, bruising, pain, redness, discoloration, and itching. With JUVÉDERM® XC injectable gels, most side effects are mild or moderate and last 24 hours following treatment. Side effects may be more common in areas of the face that are treated for the first time. They may include swelling, bruising, redness, and pain that last up to 2 weeks. For JUVÉDERM® XC, side effects are moderate (uncomfortable) and last 2 to 4 weeks. One of the risks with using this product is unintentional injection into a blood vessel, and while rare, the complications can be serious and may be permanent. These complications, which have been reported for facial injections, can include vision abnormalities, blindness, stroke, temporary scabs, or permanent scarring. As with all skin injection procedures, there is a risk of infection.

To report a side effect with JUVÉDERM VOLUMA® XC, please call Allergan Product Surveillance at 1-800-624-4261.

For more information, please see Juvederm.com or call Allergan Medical Information at 1-800-433-8871.

Available by prescription only.
