

A complete diver communications assembly especially for use with AGA Full Face Masks (FFM)

The AGA Comms Assembly is comprised of a dynamic Hi-Sense microphone with cover plate and a fully encapsulated earphone, all connected to the surface operator via a wet mateable connector. The assembly is easily fitted to the FFM using the made-to-measure cover plate which creates a seal when secured with the two supplied mount screws.

A range of configurations and customisation options are available, such as a dual earphone version, specified cable lengths and available with a range of different connectors used in the diving industry.

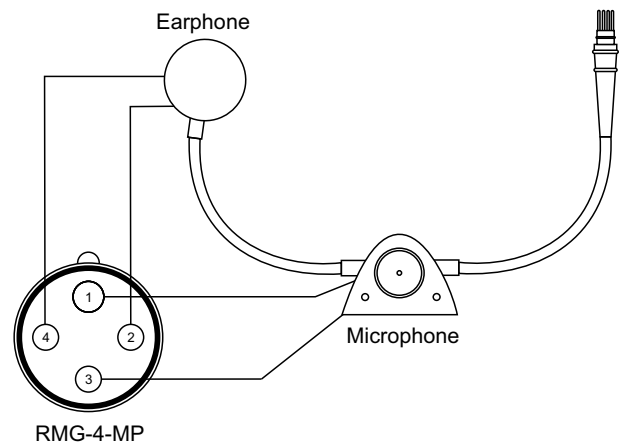

Specifications

Microphone:	8 ohm
Earphone:	28 ohm
Nominal cable length:	300mm
Cable material:	Neoprene Rubber
Standard connector:	RMG-4-FS
