

**Title: The Architecture of Decision:**

**Executive Summary Framework: Live Book Protocol™**

**The Objective:** This protocol is designed to bridge the gap between the "Fixed Spine" of leadership theory and the "Live Street" of real-world crisis. While the book provides the logic, the Protocol provides the diagnostic tools to apply that logic in real-time.

**The Three Pillars:**

1. **The Fixed Spine:** The timeless principles that do not change, even when the environment does.
2. **The Living Layer:** The **Ultra-Forensic Five** (Chapter 11) and the full **100 Diagnostic Gates** that allow you to audit your specific context.
3. **The Forensic Audit:** A high-stakes evaluation of what outcome must not be damaged—regardless of the cost.

**How to Use the Tools:** Scan the QR codes found in **Chapter 11** of the book to access the **Ultra-Forensic Five**. These entry-point inquiries are designed to expose the "density" in your decision-making and clear a path to a high-value outcome using the full **100 Diagnostic Gates** of the **Live Book Protocol™** system.
