Demand the Great Tasting, Quality Drinking Water You Deserve.

The Culligan Good Water Machine appliance's reverse osmosis (RO) filtration method improves the taste and odor of your drinking water and reduces microscopic impurities.[†] With reverse osmosis, water passes through an ultra-thin, semi-permeable membrane, which filters unwanted particles, such as sodium and lead. The result is the deliciously clear water you'd expect from the water experts at Culligan—available in the convenience of your own home, right at your fingertips.

To enjoy the clean, invigorating water provided by the Culligan Good Water Machine, just call your local Culligan expert who will professionally install the unit. Ideal for even the largest family, the Culligan Good Water Machine is a cost-effective solution that will give you and your family great tasting Culligan water for years to come. Even your kids will prefer the refreshing taste of your new, crystal-clear Culligan water—a great alternative to sugary drinks.

[†]Impurities may not be in your water.

TESTED & CERTIFIED

The Culligan Good Water Machine is tested and certified by WQA to NSF/ANSI Standard 58 for the reduction of:

Barium	Radium 226/228	Trivalent Chromium
Cadmium	Hexavalent Chromium	Copper
Selenium	Total Dissolved Solids	Lead

CAUTION: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

The contaminants or other substances removed or reduced by this water treatment device are not necessarily in your water. Source water exceeding chemical parameters requires pre-treatment.

A Healthy Difference for Your Home or Office

Culligan drinking water is an easy and welcome way to help you and your family or coworkers enjoy a healthier lifestyle. With a Culligan drinking water system you will benefit from having clean, refreshing Culligan water available at any time. The Good Water Machine includes a drinking water faucet for your home, and with the optional Good Water Sentry monitor that continually monitors the RO filter for optimum operation.

The Good Water Sentry™ Monitor option continually monitors the RO filter for optimum operation.

- Green means quality Culligan water.
- Red means it's time for a filter change.

Less Expensive

With the long lasting filters within Culligan Drinking Water Systems, you'll enjoy a continuous supply of great tasting water for pennies a glass without the hassles of small pack or 5 gallon containers.

Going Green was Never So Easy

By using a Culligan Drinking Water System you are helping to reduce the amount of plastic bottles that end up in landfills along with decreasing the amount of oil and gasoline used to produce and deliver these bottles.
